

AEROPLANE MAKES GREAT SPEED RECORD

Flies Through Space for
Period of Fifty-Seven
Minutes

FLIGHT MADE PUBLICLY

Orville Wright Gives Splendid Ex-
hibition in Tests Made
at Fort Myer.

Washington, Sept. 9.—To America and Orville Wright of Dayton, O., go the honor of accomplishing the most marvelous feat in aviation yet recorded. The Wright aeroplane, operated by the aviator, whose brother, Wilbur, has been conducting successful tests in France, sailed today over and around the parade ground at Fort Myer, Va., for 57 minutes and 31 seconds, exceeding by more than 26 minutes the hitherto world breaking record made last Monday by Delagrange near Paris.

During the flight the machine maintained an average speed of about 38 miles an hour, or only two miles an hour less than that required by the government contract for speed on a straight away course.

Upon alighting Mr. Wright said: "I could have remained up 10 or 15 minutes longer. I still had some gasoline left. The motor worked almost to perfection, and weather conditions were perfect."

Sailing along at express train speed the bird like craft responded immediately to the slightest touch of the steering lever and maneuvered higher or lower, as the planes were managed by the operator. Fifty-eight times Wright circled around the course.

AEROMOBILE

Expected to Develop a Speed of 100
Miles an Hour.

Washington, Sept. 9.—Emile Berliner, of this city, inventor of the telephone transmitter now in general use, who has been experimenting with the helicopter type of flying machines has issued a statement outlining the essential points of his machine which he calls an "aeromobile." Berliner says:

"I have lately constructed an experimental propeller of such power that, placed horizontally, it is capable of lifting 300 pounds in a calm straight up into the air. There is no gas bag and no aeroplane, simply a motor weighing 100 pounds, some frame work, gearing and a two bladed fan, the latter having a surface of about 36 square feet.

"Moreover, the whole apparatus outside the seat for the operator is entirely of steel and aluminum, and is built substantially and for practical use.

"A peculiar importance of these experiments lies in the fact that a power propeller capable of flying straight upward with an operator would, when attached vertically to a modern aeroplane, force the latter through the air at a very high speed, probably 100 miles an hour, and would double the present speed of dirigible balloons."

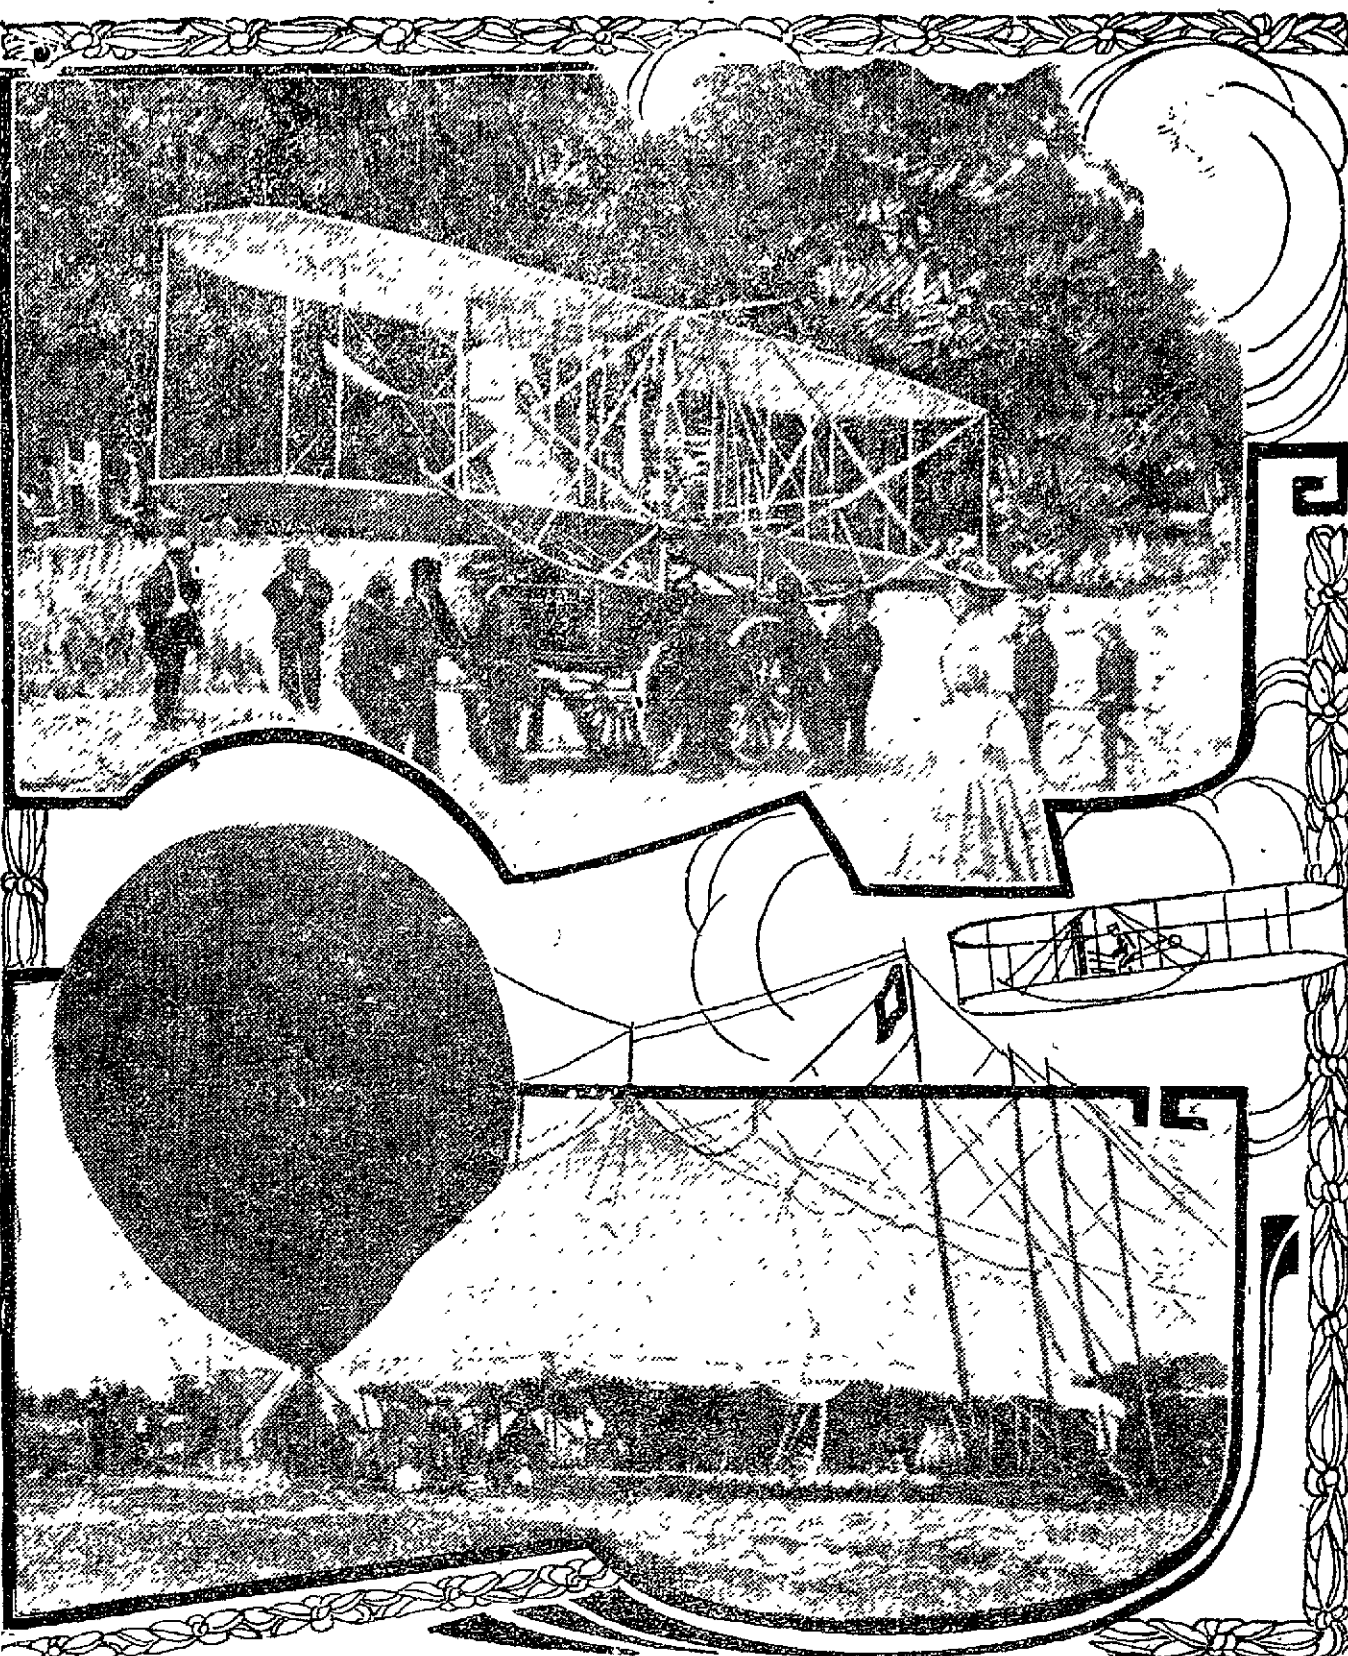

ROSEVILLE AGAIN VOTES DRY.
Zanesville, Sept. 9.—Roseville yesterday voted dry, the ballot standing 241 to 148. The election came at the close of a sensational campaign. A feature of the vote was that the wets polled 31 fewer votes than were signed to their petition for an election. Two years ago the town voted dry by 18.

WHAT IS IT?

What famous composer of music?
Answer to Tuesday's puzzle—
Beethoven.

AEROPLANE WHICH MADE RECORD FLIGHT AT FORT MYER

WRIGHT AEROPLANE AND AEROPLANE TENT

W. J. BRYAN

Delivers Speech on "State and Na-
tion" at Illinois Democratic State
Convention.

Peoria, Ill., Sept. 9.—Proceedings of the Democratic state convention which began here at 12:30 today were overshadowed by the presence of William J. Bryan, Democratic candidate for president. General Adlai Stevenson paid a tribute to Bryan, and following the speech Mr. Bryan was introduced and delivered his address on "The State and Nation." After the speech had been delivered Mr. Bryan addressed an overflow meeting in the court house square.

BRIDGE

Gave Way and Knox County Man Has
Narrow Escape From Death.

Greer, O., Sept. 9.—Mr. Hillier, who resides near here had a narrow escape from death Tuesday. Just as he was crossing a bridge with a threshing engine and clover separator the floor of the bridge gave away and the engine and separator crashed through into the stream. Mr. Hillier saw the bridge sway and jumped into the water escaping serious injuries, but received a few bruises. The engine and the separator were demolished.

IN CANAL

Family Driving Horse of Mr. Rath-
stein Was Found After Having
Mired in Mud.

A fine family horse, belonging to M. Rathstein, proprietor of a grocery at West Main and Eighth streets, was found Wednesday morning about 6 o'clock, completely mired in the canal. Only a small portion of the animal's head was protruding out of the mud when the rescuers, with block and tackle, arrived on the scene.

M. Rathstein, owner of the horse, stated Wednesday that the animal had not been securely tied in the stable Tuesday night and had succeeded in forcing its way out, wandering to the canal bank. About 6 o'clock the disappearance of the animal was discovered, and inquiry developed the fact that a man had seen the horse floundering in the mire in the rear of the Lippincott stables. The horse may recover.

The fact that there are germs in money doesn't prevent the average man from taking a chance at becoming an invalid.

FIRE BURNS CLUB HOUSE

Philadelphia, Sept. 9.—During a fire early today which completely destroyed the Philadelphia Cricket club house at St. Martins, one man was burned to death and two women were seriously injured.

ACTOR WHO SLEW WIFE AND PUT BODY IN TRUNK

Insanity probably will be the plea in defense of Chester S. Jordan, the Boston man charged with murdering his actress wife and putting her body in a trunk. Jesse L. Livermore, the

CHESTER
S. JORDAN

wealthy Boston operator, whose wife is a sister of Jordan, has been summoned to aid the defense. Young Jordan lived in Indianapolis at one time and began his stage experience there while he was a high school student.

FIRE FIGHTERS

Are Kept Busy Near the Franklin-
Madison Township Line—Many
Acres Burned Over.

Owing to the extremely dry weather of the past few days, the grass in the fields has become parched and is as dry as tinder making it necessary to use the greatest precaution in order to prevent fires. Notwithstanding this diligence, a number of fires have already been reported as occurring in various parts of this county. A gentleman who drove into the city from the southeastern part of the county Wednesday morning reports a fierce fire raging on the place of Mr. Thomas Stevens, near the Franklin-Madison township line, and he estimates that between thirty and forty acres had already been burned over. Farmers from the surrounding country, however, were engaged in fighting the fire, and the prospects at last accounts, were that it would soon be under control.

FOREST FIRES STILL RAGING

SHIFTING OF WIND SAVES SEV-
ERAL TOWNS FROM ENTIRE
DESTRUCTION.

Michigan Towns Still in Danger and
Scores of Fires are Raging in
the Black Hills.

Duluth, Sept. 9.—Only the shifting of the light wind blowing during the night saved the town of Hibbing from destruction, according to messages from there today. The situation at Hibbing was rendered less critical today when the wind died down and the fires subsided. It is believed also that conditions at Grand Marais, on the north shore, have improved with the subsidence of the wind. Advances received here from Sturges, S. D., and from Calumet and Norway, Mich., state that the forest fires are also raging near there. Scores of fires are raging in the Black Hills.

ILL HEALTH

Cincinnati, Sept. 9.—Ill health drove George Weber, 61, millionaire and former sheriff of Hamilton county, to commit suicide at his country home, north of Montgomery, this morning. A daughter found the father lying in a pool of blood in the bath room.

TEACHERS' INSTITUTE IN SESSION

Prominent Educators
Present are Delivering
Fine Lectures

SPLENDID ATTENDANCE

Sessions are Being Held in the
High School Building on
West Main Street.

The first session of the Newark City Teachers' Institute was opened at 1 o'clock Tuesday afternoon, at the High school building. Supt. Simkins introduced Rev. F. E. Vernon, of the First Presbyterian church, who conducted the opening devotional exercises.

The first speaker of the afternoon was Miss Jessie Newlin, of the University of Chicago. Preliminary to introducing Miss Newlin, Supt. Simkins read an extract from a letter written by Miss Nancy Byers Vance, from Potomac, Idaho, where Miss Vance is now teaching, and where Miss Newlin did her last institute work. The speaker then took the platform and announced as her first subject, and one of the fundamental ideas in her work for the week, "The Opportunities of the Reading Lesson." In opening she spoke of the history of written records, and the imperative demand that this closed book of history become an open book to us of today, whose life is the resultant of all past ages. The reason for the birth of the public schools was that the needs of the child might be met, and one of the first and most practical demands to be met, placed reading in the school curriculum.

Reading has been accepted as a means to a well defined end, but there is a general complaint that it is most poorly taught of any subject in our school course. One reason for this is that most teachers emphasize entirely the value of speaking clearly, recognizing the written word, enunciating well—all important, but secondary to the recognition of the word thought, content, emotion, experience. The child lacks ability to attack aggressively the printed page put before him and so, in dwelling upon the expression, rather than the thought, he loses the great opportunity of the reading lesson, failing to grasp its content as a whole. Even in our colleges, students fail to grasp the value of the lesson because they do not know how to study. Reading offers us as great opportunity for exactness in thinking, and clear perception, as mathematics—or something is wrong with the large majority of us as teachers are too apt to accept vague perceptions, blurred pictures, aiming only at a result, rather than the result, and forgetting that the opportunity of the reading lesson is an introduction to accurate, sound, methodical, scientific mental action.

Much of the trouble in our system lies in a lack of definite, practical, accurate aim in the teaching. There are two causes of poor reading—wrong thinking and non-thinking—99 per cent of the trouble coming from the latter. The loose habit of thinking in connection with the printed page explains difficulties that later seem insurmountable, and so the reading lesson is really the laboratory of clear thinking, and the fundamental basis of success in every practical subject.

As the second speaker for the afternoon, Supt. Simkins introduced Dr. Suzzell of Teachers' college, Columbia university, New York. The speaker, with very brief preliminary, entered into his subject, speaking of the present age as a period of transition in social, economic and educational worlds, and a period of adaptation to the realization of new ideals, and distrust of present conditions.

In looking toward the future and the destinies of human democracy, we find high value given to our educational institutions and our teachers, but our daily view of the same institutions is narrowed and abridged, owing to a peculiar lack of adjustment from which we are suffering, and lead us today to focus our attention upon the relation between our educational systems and the community in which our work is done.

There was a time when education was largely a matter of art, but that conception has given way to a spirit of scientific examination and criticism. Scholarship has ceased to be the only qualification, and for a time psychology and child study led us into

strange peregrinations. As a correction to this came the final and third pointed view, and we began to realize that our studies must be a means of making the child a socialized individual, adapted to the maintenance of the probity of life. Social demands must be the final test of the efficacy of an educational institution. As a fundamental consideration, we must remember that the function of education must be considered with a view to its value under our existing social conditions. Under the highest civilization, education looms high as a factor in the community. We have, in every great society, two great methods of controlling humanity, and it is the mark of an educational control which keeps order, free rather than coercive. In the progress of civilization the great end of education is to be a free, liberalizing force, controlling from within, rather than from without. Education is democracy's greatest instrument for social control. The school cannot establish its own standards without studying the social life of its community. When this is done, the teacher ceases to be a pedagogue, and becomes a representative of the social life around him. Once we have raised men out of primitive conditions, they become permanent acquisitions to civilization, but the teacher is the permanent representative of civilization and society on the permanent frontiers of childhood. Much of the praise given the teacher is based on theoretic recognition of his function in society, to which ideal his practical work should measure up, however impracticable with his daily work it may seem. We must face frankly the work of remodeling our system of education, and readapting it to the needs of society. Education is no longer merely a privilege for the individual, but a compulsion and obligation for everyone, and so, in terms of social conditions, our educational values need to be re-estimated. Our teachers should be commanders of the social situation, adapted to a control in vicarious conditions. The medieval idea of asceticism, with its peculiar plan of educational organization has transmitted to the present time a strange idea of unworldliness. (Continued on page 5.)

SERVICE BOARD

Gives Employment to Many Men and
Pay Roll for Past Month Has
Been Quite Large.

Few residents who pay taxes for the government and proper maintenance of the city in which they live, know half the workings of the great system under which their town is kept up. This fact is more than emphasized by a glance into the accurate workings of the Newark Board of Public Service.

Perhaps it is not generally known that the city of Newark alone employs on an average as many men as many of the larger manufacturing industries. For instance, last week it is estimated that 375 men were given employment by the city, directly or indirectly. Some of these were employed by general contractors working on contracts for the city, while a large proportion of them were working for the city itself.

The general receipts of the Board of Service for the month of August were \$832.40. The pay roll last Saturday for those men employed by the city directly, engaged in street cleaning, grading, repairing, sewer cleaning, etc., amounted to \$976.14. On the roll for the week were 112 men.

In addition to this it is estimated that the sum paid out for street paving, sidewalks, retaining walls and sewers for the week amounted to \$8479.13.

The water works expenditure for the week, under estimate No. 1, including pipe laying, etc., made the sum reach a total of \$9455.27 paid out for labor. This does not include any of the monthly pay roll for August 30th.

The water works contractor employs about 100 men. All of the money included in the above figures is paid to Newark citizens and taxpayers. Of the 375 men employed by the city the greater number are B. & O. shop men, glass workers and other men of the trades who are given this opportunity by the city.

It is indeed fortunate that at this time the city is prepared to offer employment to nearly half a thousand men at a good, reasonable wage scale, and when one takes a glance at the figures, the duties of the Board of Service under whose management all of these contracts are let, may be slightly imagined. And it is plain to be seen that a most accurate and perfect system of accounting must be required to keep strict account of the cost, number of men employed each day, and progress of the city's work.

In this respect the present Board of service is to be congratulated. A complete system of careful scrutiny of all of the city's work is kept, so that at any time the Board is able to tell the cost and progress of any particular contract for any one day. It requires an almost endless amount of attention, but with a competent office force and a complete system of accounting the work is greatly facilitated.

MR. PARKER ANSWERED SERENADE

And Hurlled Thunderbolt
at the Republican
Administration

SUMMARIZED SITUATION

Workingmen and Negroes Not
Wards of Party That Finds Two
Millions Unemployed.

Washington, Sept. 9.—Judge Alton B. Parker, Democratic nominee for President in 1904, addressed a gathering of district Democrats who first serenaded him at his hotel here last night. He summarized the national political situation in a striking way. This was his epitome of it:

"Don't forget that Democracy faces an alert enemy; that the President of the United States is the most accomplished politician of modern times; that there is a serious menace to the whole country in his coming back to Washington to place his finger on the political pulse; that good corporations will contribute to the Republican campaign fund; that the President has at his command 99,200 Federal office holders.

"But, then, remember, that the great insurance companies don't dare contribute this year from the policy holders' pockets; that it has been discovered that the Republican party doesn't necessarily fill the dinner pail; that the Republican party is not essential to prosperity; that in this Republican administration 2,000,000 people are out of employment; that the Republicans have on their hands bitter local fights among themselves in various states; that a great many negroes have concluded that they are no longer wards of the Republican party; that the Democratic party of the United States is once more united; that everywhere there is a disposition on the part of many Republicans to support us, and a willingness on the part of Democrats to let bygones be bygones."

CONGRESS

Of Eucharists in Session at Westmin-
ster Cathedral—Many Notables
are Present.

London, Sept. 9.—The nineteenth annual international Eucharist congress, the first gathering of its kind ever held in a protestant country, opened here today at Westminster cathedral. Nine cardinals and many arch bishops are in attendance from every part of the world.

SCHOONER

Los in Storm Off English Coast and
Crew of Nineteen Were
Drowned.

London Sept. 9.—The schooner Phyllis Gray was lost today off Devonshire in a storm that is again sweeping the English coast and channel. Her crew of 19 were drowned. Both British and continental coasts are being piled with wreckage. A heavy loss of life is sure to be reported.

MANIAC

Secured Broad Axe and Started a
Wholesale Killing—Placed Under
Restraint.

Wilmington, Del., Sept. 9.—During a temporary fit of insanity, Pearson Talley, 60, secured a broad axe today while his family were sleeping and murderously attacked his wife, his niece and the latter's husband, inflicting wounds from which they are not expected to recover. Talley was arrested.

STRIKERS ARE HELD RESPONSIBLE

Philadelphia, Sept. 9.—Strikers tampering with signal boxes on the line of the Southwestern Traction company, a branch of the Chester Traction company, are believed to be responsible for the head-on collision today near Penrose Ferry bridge. One man was probably fatally injured and 25 others, many of them women, were severely hurt.

Aerial Navigation Assured

While the Public Has Been Skeptical and Has Sometimes Jeered, Captain Thomas S. Baldwin and the Wright Brothers, After Years of Hard Work, Finally Succeeded.

By JAMES A. EDGERTON.

HENRI FARMAN, the French aeronaut, recently said that within ten years flying machines would be as common as automobiles. That may seem a trifle optimistic, but is not impossible. The great step has been taken; men actually fly. The matter of making machines for commercial use is now merely a question of time.

We do not properly measure the importance of the event. The future will doubtless class it as the greatest accomplishment of all the marvelous things done in this age of invention. What revolutions it will work in transportation and in human affairs generally can now only be dimly surmised. The overwhelming fact is that the thing of which men have dreamed through the ages has been achieved. The cause has been set in motion. The fame of it will be told, and the effects of it will flow out to bless mankind as long as the world stands.

The United States war department has already bought the Baldwin airship and is now testing the Wright brothers' aeroplane. Orville Wright is in France making demonstrations that are the wonder of the world. The German army already has its airship

Sails Sidewise.

The Wright brothers' aeroplane has been described as looking like a street car with the sides and ends knocked out, leaving only the top and floor with frail uprights holding them together. The machine sails sidewise, with its

far enough advanced in their work to go before the world.

Natural Inventors.

The Wright brothers are about forty years of age. Wilbur, the older, who is in France, is smooth of face and bald. Orville, who is now at Fort Myer, is about four years younger, wears a slight mustache and is just saved from baldness by a little tuft of hair on the top of his head. Both brothers are tall and slight, both are precise, scientific, reticent and almost cold in manner, and neither apparently cares for money or fame. They are natural inventors, having learned wood engraving while mere boys and having constructed a printing press out of a little old rubber, some cord wood, part of a buggy top and a few other odds and ends picked up in the back yard at home. Then the bicycle craze came along, and they started a bicycle repair shop and from this went into the untrodden and uncertain field of airship invention. At first they tried to work with balloons, but soon gave these up for the aeroplane, of which the world is already acknowledging them to be the practical inventors. They have worked wholly with their own money.

Captain Thomas S. Baldwin, who has already met the test and sold his dirigible balloon, the California Arrow No. 10, to the United States government, is an older man and a much older aeronaut than either of the Wright brothers. Captain Baldwin invented the modern parachute, in which he made the first public descent. He has made innumerable balloon ascensions all over the world. Before he entered this field he was a circus performer and tight rope walker. It was he who caused the world to gasp by walking a wire high over the pounding billows of the ocean at the old Cliff House, San Francisco.

The Baldwin airship is entirely different in principle from the Wright brothers' aeroplane. The California man depends on the lighter than air style of machine. His balloon is shaped like a long, fat cigar. Under this is a light frame, fitted with motor, rudder, propeller and kite attachments for maintaining equilibrium. One point in which Baldwin's ship differs from others is that he has his propeller in front, depending on a pull rather than a push. In the machine sold to the government two men can ride, one to run the airship and the other to take observations. The United States officers were exceedingly gratified by the tests. After turning the balloon over to the government Captain Baldwin instructed two army men in its navigation. Lieutenant Lahm, already famous as an aeronaut, being placed in control. Officers of the army will now ask congress for a million dollar appropriation for a balloon brigade. It will doubtless take congress about ten years to see it and catch up with the procession, but eventually it will come around.

Sailed Over Vesuvius.

Baldwin's parachute leaps, beginning more than twenty years ago, created a sensation around the world. He conducted them all over America and in foreign lands. He was awarded the first gold medal ever presented by the Balloon Society of Great Britain. One of the daring aeronauts' feats was to sail over Mount Vesuvius.

Baldwin has brought several new inventions into aeronautics. The most important perhaps is the twin propeller, consisting of two propellers running in opposite directions on the same shaft. This brought about the perfect balance so long sought by aeronauts. No less important is his placing the screw in front of his machine rather than in the rear, which draws the balloon forward into a practical vacuum. Under the old way the vacuum was created behind and retarded the speed. Captain Baldwin uses a two ply and in some spots a three ply Japanese silk envelope, which is also an improvement. He has made many advances in the science of equilibrium and in reducing what is known as "skin friction."

Captain Baldwin's Claims.

The airship sold by him to the government has a gas bag eighty-four feet long and eighteen feet in diameter at the thickest spot. The government required that the machine be capable of attaining a speed of twenty miles an hour, but Captain Baldwin claims that it is actually capable of twenty-six or twenty-seven.

While most scientists agree that the aeroplane is the ultimate flying machine, the greatest progress up to date has been made in the lighter than air vessel, or dirigible balloon. In fact, little has been accomplished in the other field except by the Wright brothers.

Most of us can remember when the automobile was a novelty. The writer is under forty, yet he recalls the time when the first "horseless wagon" was used, and it was only about a score of years ago. It was in Wheeling, W. Va., where I first beheld the monster. The machine was a big, clumsy affair, with large wheels, uncertain steering apparatus, and was run by a very noisy steam engine. This was so great a failure that it was some years before another crossed my field of vision.

If the automobile could be so vastly improved in so short a time, who can predict what may occur in the field of aerial navigation now that the principle has actually been discovered and is before the world?

NEW QUESTIONS FOR TEACHERS

Applicants For County Certificates Must Answer Them.

EXAMINATION HELD SEPT. 5, 1908

Prepared By the State School Commissioners to Test the Mental Qualifications of Those Who Seek Positions in the Public Schools.

Following is the list of questions as prepared under direction of the state commissioner of public schools, and submitted at the county examination for teachers Sept. 5 for elementary school certificates:

ARITHMETIC.

1. State and explain the relation of time to longitude. Explain standard time.
2. If to every 6 gallons of milk 4 quarts of water are added, find the value of a pint of the mixture, pure milk being worth 3 1/2 cents a pint. Give full analysis.
3. Explain in detail the process of reducing 4-7 to 21-7; 31-7 to 43-7.
4. A man bought 50 shares of stock at 120 1/4 and 6 months later a 31-2 per cent. dividend was declared. He then sold the stock at 118, brokerage in each case 1-8. Find the net gain or loss, money being worth 5%.
5. An article was sold for \$225 after a reduction of 10% from the market price; the article was marked so as to gain 31-3%. What was the cost?
6. What must be the depth of cylindrical cistern 6 feet in diameter to hold 100 barrels of water?
7. Define legal interest, personal property, direct ratio, trade discount, inventory.
8. The length of one of the equal sides of an isosceles triangle is 13 feet and the base 10 feet. Find the altitude and the area of the triangle.
9. The net cost of a bill of hardware was \$68.50. What was the gross amount of the bill if it was bought at a discount of 20% and 12 1/2% off?

THEORY AND PRACTICE.

1. Give a good definition of education.
2. Define teaching. In what three fundamental processes may all teaching activities be included?
3. Give three fundamental ends to be attained in teaching.
4. State some advantages of class legislation.
5. Give methods for cultivating attention; imagination.
6. Give a clear summary of all that good reading involves.
7. Discuss the relation of the common school to the home.
8. Discuss briefly the following: "The importance of proper methods of teaching."
9. If we believe in the training of teachers, what is our personal duty in the matter?
10. What educational meetings have you attended in the past year? Mention some benefit received at those meetings.

GRAMMAR.

"Oceans of ink, and reams of paper, and disputes infinite might have been spared, if wranglers had avoided lighting the torch of strife at the wrong end; for a tenth part of the pains expended in attempting to prove why, where and when certain events have happened, would have been more than sufficient to prove that they never happened at all."

- Questions 1-6 refer to the foregoing selection.
1. Classify the foregoing as to form. Mention the dependent clauses and give the office of each.
 2. Give the subject of the first finite verb. Give the object of the second finite verb.
 3. Give the subject nominative and predicate verb of each proposition following the semi-colon.
 4. Give the mode and tense of each predicate verb.
 5. Select a substantive infinitive phrase and an adverbial phrase.
 6. Give the part of speech and the syntax of each of the following: "infinite," "if," "lighting," "more," "than," "sufficient."
 7. Write a sentence containing the direct form of quotation and change it to the indirect form. Mention the principal changes made.
 8. Change the italicized phrases to subordinate clauses and give the classification and the syntax of clauses formed:

- (a) Having packed his trunk, he was ready to go.
- (b) The thirteen colonies were welded together by measures framed by Samuel Adams.
- (c) I saw the boy hurrying to meet his mother.

WRITING.

Writing as shown in the manuscript on orthography will be graded with reference to regularity in the formation of letters, legibility and neatness.

ORTHOGRAPHY.

1. Give and illustrate three rules for spelling (not forming plurals).
2. Define the following words, or use each in a sentence: eulogy, embryo, precedent, autonym, induction.
3. Use the following prefixes in derivatives and state how the prefix modifies the meaning of the word in each case: for, em, with, be.
4. Write out in full: i. e. e. g. f. e. b. prov. L. L. B.
5. 10. Spell the following words to be pronounced by the examiner: settler, rebellion, artillery, disperse, relieve,

stopped, weather, fortieth, Gibraltar, misery, mysterious, pastime, descending, berries, pursuing, digit, proceeds, specimen, horses' (possessive plural), audible, Minnesota, fiery, innocence, blasphemer, saythe, conqueror, plaud, allege, trolley, forcible.

PHYSIOLOGY.

1. Define or explain four of the following: systole, lacteal, chyle, plasma, pepsin.
2. Give the effect of alcohol on the gastric juice; on the mucous membrane.
3. What are bacteria? In what way are they (a) the friends of man, (b) the foes of man?
4. State in what organs and by what fluids each of the following food principles is digested: fats, proteins, starch.
5. Describe the structure and state the principal function of the red corpuscles.
6. What are the functions of the liver?
7. What is the direct cause of astigmatism? To what is the color of the eyes due?
8. In what way does the product of the lymphatic glands reach the blood?
9. Describe the structure of the veins as to their walls and valves.
10. State briefly the function or uses of: the sympathetic nervous system; diaphragm; retina; periosteum.

UNITED STATES HISTORY INCLUDING CIVIL GOVERNMENT.

1. Compare the founding of Virginia and Massachusetts.
2. Name four grievances against George III. stated in the Declaration of Independence.
3. Show briefly how each of the following aided the cause of the Revolution: Lafayette, Franklin, Steuben, Greene.
4. Give an account of the publication known as the Federalist, covering authorship, purpose and historical importance.
5. State four important points which the purchase of the territory of Louisiana secured to the United States.
6. What were the causes of the War of 1812? Give the results of this war.
7. What was the paramount issue in the presidential campaign of 1860? State the position of the leading political parties on that issue.
8. Give an important result secured by the capture of Vicksburg; by the defeat of the Merrimack.
9. State the essential difference between the fourteenth amendment to the Constitution and the fifteenth. Which of these amendments was responsible for "carpet-bag" government?
10. How is a state divided into congressional districts?

READING.

Examiners will conduct an oral examination in reading.

LITERATURE.

- Select any eight questions.
1. Discuss the beginning of English literature before 1300.
 2. Name the two most prominent non-dramatic writers of the Elizabethan Age and give a work of each.
 3. Characterize one of the following: Ophelia, Portia (Merchant of Venice), Richard III.
 4. Give the important characteristics of the writings of each of the following: Milton, Scott, Browning.
 5. Give the author of each of five of the following: Alexander's Feast, She Stoops to Conquer, Conciliation With the Colonies, Essays of Elia, Vanity Fair, Sesame and Lilies.
 6. Give an account of Emerson's life and works, touching on the important events of his life, his ideals, and his works.
 7. What two famous American poets were exponents of the anti-slavery movement?
 8. Compare Irving and Cooper as to class of works, sources of material and method of treatment.
 9. Of what school of writers was Thoreau the forerunner? Name two later authors who have written works similar to Thoreau's.
 10. Name the work in which each of the following is found and give the author of the work named: Topsy, Phoebe, Pyncheon, John Alden, Ichabod Crane.

GEOGRAPHY.

1. State from what line, in what directions and through how many degrees longitude is generally reckoned.
2. Define river basin, tide, desert, limited monarchy.
3. Locate the following cities by telling in what country and in what zone each is situated: Moscow, Bombay, Pretoria, Cairo, Valparaiso.
4. Name the five leading dependencies of Great Britain in the Eastern Hemisphere.
5. Name the drainage slopes of the United States.
6. Discuss the physical features of Holland; the recent diplomatic strained relations between Venezuela and Holland.
7. Name the territories of the United States. Give the capital of each.
8. In making a voyage from St. Louis to St. Petersburg, name in order the bodies of water passed through.
9. Locate: Tacoma, Budapest, Bremen, Auckland, Port au Prince.
10. What form of government has each of the following: Russia, Turkey, Japan, Brazil, Egypt? Give the title of the rulers of each.

INTENSIVE GARDENING.

The last decennial census reported that the annual value per acre of vegetables in Queens county, N. Y., was \$140, the highest average in the country, the general average for the United States being \$42. These figures pale, however, when compared with the market gardens around Paris, the average annual value of whose product is given in the latest official report as \$1,600 an acre. We have something to learn from the French in methods of intensive gardening.—New York Sun.

\$1,000 for the Best; \$750 to Second; \$500 to Third; \$250 to Fourth, and \$5 Each to Next 100 Winners.

TABASCO LIMERICK.

A soubrette who worked for Papasos One day kicked up quite a fiasco, As the hair on her head Turned from yellow to red

WHAT IS TABASCO?

For forty years it has been used by cooks everywhere. Every first-class hotel, steamship, restaurant and dining out uses it in the kitchen and upon the table. Tabasco is great for soups, roasts, fish, fowl, game, seafood, for eggs of any style, for the outdoor luncheon or the afternoon salad. Use it in your kitchen all the time. What makes excellent the cooking of the chef will make delicious the food of the home. Get the Tabasco habit in your kitchen, on your table. One drop works wonders. Buy from your grocer today. He has it; every grocer has it. Ask his opinion.

This contest is open to everybody free. Send in your limericks in your own way and as often as you please. The fund to pay these prizes is now on deposit with Geo. W. Young & Co., Bankers, New York City.

BOOKS STILL COMING INTO CITY LIBRARY

Funds Are Needed to Carry on the Work—Rules Which Have Been Issued by Officials.

The following is a list of books donated during the past week to the Newark Public Library, for which they desire to express their thanks to the donors:

Mr. J. H. Newton, 11 volumes; Mrs. A. H. Pierson, 4 volumes; M. Warner, 5 volumes; The Review club, their library consisting of over 80 volumes. They are also going to subscribe for a number of the leading magazines, periodicals, etc., for the year. Mr. Rawlings, the Saturday Evening Post for the year. Mrs. Clara Smett White, Granville, 4 volumes.

The library is now in special need of money donations and ask that the public cheerfully respond by bringing or sending money to the library.

This new institution, just starting, should not be hampered by the want of money to carry on the work which has been started and any person desiring to contribute should at once communicate with the librarian or trustees, who will surely appreciate any donations that may be made.

In order to give you an idea of what you are required to do in order to get books, the following rules have been issued by the library:

"Any one who is over ten years old is entitled to a card."

Your library card entitles you to borrow one work of fiction and one volume of non-fiction.

Your card shows: (1) How many books you have. (2) When they are due.

A fine of three cents a day is charged for each overdue book.

The newer fiction is loaned for seven days only and cannot be renewed.

Books other than fiction are loaned for two weeks and may be renewed for two weeks more unless reserved for another borrower.

To renew a book bring your card to the library.

Your card must be presented whenever a book is borrowed or returned.

Books other than new fiction may be reserved by the payment of three cents.

The shelves are open to all readers.

Library open from 9 a.m. to 9 p.m. week days, excepting legal holidays.

The Color Tells The Story.

P. & G. Naphtha Soap is white. That proves its superiority.

P. & G. Naphtha Soap is white—there is no rosin in it. Ordinary naphtha soaps are yellow—they contain rosin. The yellower they are, the more rosin there is in them.

Rosin is not especially harmful; nor, on the other hand, is it of any particular value. But it is cheap, and that is why most manufacturers of naphtha soaps use it. The way to be sure to get full value for your money, when you buy naphtha soap, is to ask for P. & G. Naphtha Soap—there is no rosin in it.

5 cents a cake; all grocers.

Going to Build Or Remodel?

If so, you'll be interested in our prices on slate and metal roofing. Not only are our prices very reasonable, but all materials are high class and the workmanship unexcelled.

NOTICE

INDEPENDENT ORDER OF FORESTERS.

All members are requested to be present Friday evening, to discuss the change in rates, commencing October 1, 1908. All dues must be paid before said date. Signed, Chief Ranger E. L. Hartman. 9-3t

Birth Announcement.

Born, to Mr. and Mrs. L. L. Boss, of Highland avenue, a son.

Sermon to Men.

Evangelist Dillen will preach a special sermon to men at the North End tabernacle this evening on "Heroic Manhood." All men and also women are invited. Miss Mary Dillen will sing.

Missionary Meeting.

The regular missionary meeting of the Ladies' Aid society of the Salem Presbyterian church will meet Thursday at 2 o'clock p. m., at the residence of Mr. and Mrs. Richard Shide, Cherry Valley. All are invited.

Gov. Hughes in Newark.

Governor Hughes of New York and Frank Hitchcock, chairman of the Republican national committee, and other distinguished Republican politicians, passed through Newark Tuesday morning over the B. & O., en route to Chicago.

Made Pipe Test.

A pipe test of 155 pounds was made in North Newark Tuesday after-

noon on about a mile of the piping of the municipal water works, north of Charles street. The test included eight inch pipe on Hudson avenue, north of Charles, and the six inch pipe on Channell, Stevens, Hollander, Bolton, Priest and Smith streets. The test was pronounced a success.

Tuberculosis Experiments.
Dr. Hugh Sheppard of Danville, Ill., considered one of the leading authorities in this country on tuberculosis, was in the city, Wednesday meeting his former college associate, Dr. A. D. D. Weintz, of Adrian, Mich., who has been visiting relatives here. Both will leave on Friday for New Haven, Conn., where a tuberculosis commission of the New England Medical society will conduct experiments during the coming week.

Copy of Old Paper.

Mr. Jack Brilliant, manager of the Brilliant company's local store, is in possession of a real and original copy of the Universal Gazette, published in Washington, Thursday, March 8, 1804. The copy is very well preserved and is mounted on a lamp skin covering. Mr. Brilliant secured the curio about two years ago from an employee who had kept it in his family for many years. He will present it to a nephew who has a large curio collection.

Fractures Left Arm.

Mr. Joshua Hull, the well known meter reader for the Newark Natural Gas company, while going to his room in the Lansing block, Tuesday evening, slipped in some manner and fell the entire length of one flight of stairs, sustaining a severe fracture of the left arm, and a number of painful bruises. Criss Bros. & Jones' ambulance took him to the Newark Sanitarium where Drs. H. D. Rank and H. J. Davis attended him.

First Presbyterian Church.

At a meeting of the building committee of the First Presbyterian church Tuesday evening, Architect Vernon Redding submitted additional sketches and was authorized to complete the plans and specifications for a new brick church. The building fund has reached such proportions as to warrant the committee in proceeding with the work, but a special effort is to be made within the next few weeks to raise about \$3000. The committee hopes to be able to begin work on the new church this fall.

Returned From Outing.

Dr. J. A. Mitchell returned to the city Tuesday evening from a ten days' outing at Muskoka Lakes, Canada. The doctor cut loose from the ordinary precedent and secured a guide and camping paraphernalia and went away from the habitat of man into the wilds where he had the fishing to his heart's content. These lakes are among the most beautiful on the American continent and furnish everything that appeals to the lover of the outdoor life.

Soldiers in Newark.

The members of the Seventh regiment, O. N. G., will come in from Fort Benjamin Harrison this evening and the West Virginia National Guard will have two special trains from Wheeling to Fort Benjamin

Harrison. They will come via the B. & O. and will be transferred to the Big Four in Columbus tonight.

Newark Hive.

Newark Hive No. 455 will meet as usual tomorrow.

Not Closed.

The skating rink at Idlewild park will be open afternoons and evenings until September 20th. 9-2t

High School Opening.

The time set by the Board of Education for the opening of High School is Monday, September 14.

Presbyterian Services.

"Watch and Pray" is the subject tonight at the Second Presbyterian church. Service begins at 7:15.

Chicken Supper.

At the First Presbyterian church, Saturday, September 12, from 4:30 until 8 o'clock. 25 cents. 9-2t

Moved Into New Home.

The family of Roy J. Baird have moved from West Locust street into a pretty home of their own at 198 North Fourth street.

Woman's Guild.

The Woman's Guild, of First M. E. church will meet Friday at 2:30 p.m. A report of the contest for membership will be given at this meeting.

Chicken for Everybody.

Only 25 cents, at the First Presbyterian church Saturday from 4:30 until 8 p. m. Come and bring your friends. 9-2t

Loaf.

This is the ideal loaf of bread because it is made with the choicest grains, the best shortening, good salt and the right yeast. Get a loaf of "Loaf" today. 5c. at your grocer's. tf

Taken to Hospital.

Lewis Abbott, son of J. B. Abbott, was taken to the City Hospital last night. The young man has been suffering for over a week with an injured foot, and blood poisoning was feared by his physician.

Pathfinders Lodge.

Pathfinders Lodge No. 79 will hold a social club meeting in Red Men's hall Thursday evening. Every member is urged to come and participate. Games of all kinds will be features of the evening.

Union Meeting.

The Fifth Street Baptist church and the North Fourth street Congregational church will hold a union service tonight in the Baptist church. There will be baptism at this service. It is desired that all the members of both churches attend.

Mr. Humes Recovering.

Charles Humes, who has been quite sick with shingles, is sufficiently recovered to be able to resume his work as a house painter. Charley is one of the boys who made the campaign in the Philippines and he says he never underwent the suffering that he has since he was attacked with the shingles.

Charley Gano Here.

The John W. Vogel minstrels arrived in the city at 12:40 over the Pennsylvania from Bradley, Pa. The parade was scheduled for 3 o'clock. With the show as stage director as well as principal comedian, is the inimitable Charley Gano, bright and jolly as ever, and prepared to furnish Newark theater patrons with plenty of fun tonight. Mr. Gano has been seen here several times, having closed several seasons' engagements with the Hi Henry minstrels last season. His presence alone ought to signify a thoroughly enjoyable evening's performance.

Narrow Escape.

Mr. Jack Brilliant of the Brilliant store on South Third street, and Mr. B. Bliss, a salesman in the store had a narrow escape from death. They were in the elevator descending from the third floor when the cable jumped off the wheel, and the elevator fell to the ground floor. Besides being badly shaken up, both men were painfully injured, sustaining numerous bruises. Mr. Brilliant had the first two fingers of his right hand mashed, while Mr. Bliss' left arm above the elbow is a mass of bruises. Dr. Barnes was the attending physician.

Contingent Teachers.

The following persons are graduates of the Newark High school, have passed the city teachers' examination, are applicants for positions in the city schools, and will be appointed contingent teachers by the superintendent of schools at the next meeting of the Board of Education, September 21, subject to confirmation by the board. Others, also, may be appointed: Beatrice Orr, Olive Acton, Helen Redman, Lena Anderson, Gladys Beecher, Ruth Miller. Miss Redman has spent a year at Denison university and is eligible to election as regular teacher. Miss Anderson has spent two terms at Ohio university. Miss Beecher has spent one term at Ohio university.

High School Examinations.

Examinations for removing conditions or for obtaining standing in the High school will be held in the High school building Friday afternoon, September 11, beginning at 1 o'clock. These who expect to take the examinations and have not already notified the principal, are requested to do so not later than Thursday noon. Irregular pupils are requested to come any afternoon this week to old office in High school building to arrange courses for the coming year. Prof. Williams will be in the office any afternoon this week from three to 5:30 and on Saturday in the morning from 9 to 11:30, afternoon 1 to 5. Prof. Williams can be called on new phone at office, two rings on 1331, and residence 1239 Prof. O. T. Williams, principal of High school.

PERSONALS

Miss Sadie Smith of Mt. Vernon is visiting in Newark.

Miss Ethel Charles is quite ill at her home, 79 South First street.

Mrs. J. N. McDonald and daughter Cleo are visiting friends in Zanesville.

Mrs. Drumm of Franklin township is seriously ill at her home southeast of the city.

The Misses Mollie and Bertha Schonberg have returned home from a two months' visit in the East.

Miss Frances Druhard of Mt. Vernon is visiting relatives in Newark for a few days.

Dr. B. B. Scott of Mt. Vernon was in the city yesterday on professional business.

Mrs. Mary Sunderland is visiting with Mrs. William Rose in Mt. Vernon.

Miss Margaret McWilliams of South Second street has returned from a ten days' visit in Mansfield.

Miss Lena Cline of Ironton, O., is the guest of Mrs. U. G. Hammon of West Main street.

Mrs. B. H. Sprankle and children left today for their home in Knoxville, Tenn.

Mr. and Mrs. Charles Smith are home from a delightful trip of several weeks to the lakes, Atlantic City, New York and other points east.

Miss Ella St. German, who has been visiting the Misses Anna and Minnie Dold, has returned to her home at Streator, Ill.

Mr. and Mrs. Richard Dold have returned home after a pleasant visit with relatives at Toledo, where they attended the G. A. R. encampment.

John Dold has gone to Kalamazoo, Mich., where he has accepted a position as pharmacist with the John Upp Drug company.

Margaret Wise, superintendent of Father Mulhearn's household of Martin's Ferry, is the guest of Miss Kearns, 63 Oakwood avenue.

Mrs. Cephas Harter has returned to her home in Johnstown after spending a week with Mrs. E. M. Larason and attending the U. B. conference.

Mrs. Herman O. Upham of Detroit, Mich., is visiting at the residence of her mother, Mrs. S. M. Hunter, on Buena Vista street.

Mrs. J. McIntosh, who has been visiting relatives at Summit Station, has, after a pleasant visit returned to her home on South Second street.

The city employees are busy these days cleaning the gutters of the streets of the city, and are now working on the South Second street hill.

Mr. Charles Meyers of the Newark Warehouse and Storage company is off duty to attend the funeral of his sister, Mrs. Kate Wycuff.

Misses Rebecca and Anna Crowe of Jacksonville left this morning for on, Stark county, Ill., to spend the winter with Mr. and Mrs. Thomas Pyles.

Mr. W. H. Fairall, a former local insurance man, has returned to the city and rejoined the forces of the Western and Southern Insurance company.

Professor Sanger and wife of East Church street have returned to the city from a summer's outing which they spent at their summer home at Lakeside, Ohio.

A. W. Thompson, chief engineer maintenance of way, Baltimore and Ohio railroad, passed through the city in his private car 915, enroute to Sandusky.

Mayor O. C. Jones and wife have closed their Buckeye Lake cottage for the season and returned to Newark. The mayor's administration of this popular summer resort proved to be highly satisfactory to all concerned.

Mr. and Mrs. James McCrum and Miss Anna White have returned from a trip to Detroit, Belle Isle and other points of interest on the great lakes. During their absence they visited Mr. and Mrs. Haag and Mrs. Clara Roberts at Toledo.

Mr. and Mrs. E. M. Stockberger of New York City, are visiting at the home of Mr. Stockberger's parents, Mr. and Mrs. William A. Stockberger of Clarendon street, East Newark. Mr. Stockberger is sales manager of the Bramhall, Doane Co. manufacturers and exporters of cooking supplies.

Miss Clara McDonald, who has been visiting at the home of her sister, Mrs. Homer Sparks, in San Diego, Cal., during the summer vacation returned home Sunday night, accompanied by her sister and her little son. Carl. They will make quite an extended visit here before returning home.

Mr. F. C. Copper, D. P. A., B. & O. railroad, attended the opening of the new B. & O. passenger station at Wheeling Thursday. Mr. Copper was very enthusiastic in his praise of the new building, which is one of the handsomest individual passenger stations in the country. Granite and Italian marble enter largely into its construction, and the building covers an entire block.

The Baltimore & Ohio railroad announces the discontinuance of train numbers nine and ten, between Mansfield and Sandusky, on and after September 14th, 1908. 1t

WALTER A. ALSDORF

Democratic Candidate for State Senator.

Mr. Walter A. Alsdorf of Johnstown, Licking county, who was nominated by the Democratic Senatorial convention for the Fifteenth-Sixteenth district, held in this city on Tuesday, September 8, is pre-eminently one of the very best men in the county, and while all the other candidates possessed excellent qualifications for the office, it was deemed wise by the convention to nominate Mr. Alsdorf.

The successful candidate is a son of Mr. John R. Alsdorf of Centerburg and was born in Utica, June 18, 1866, and is therefore 42 years of age, being comparatively a young man. His ancestors were of Knickerbocker stock, coming to this country in 1739 and settling on the Hudson. William Alsdorf, grandfather of the nominee, came to Licking county in 1834 and settled on a farm a short distance south of Utica, on Lake Fork, which is the old homestead.

Walter Alsdorf, the subject of this sketch, lived at home until he was seventeen years old, attending the public schools in Utica. He then went to Wooster, where he attended the Wooster University for one and a half years. He then returned to his home in Utica, where he remained two or three years when he went to Sioux City, Iowa, where for some time he was engaged in the lumber business, his territory covering a large part of the northwest. In 1891 he spent the winter in Lincoln, Neb., where he had the good fortune to become acquainted with the Hon. W. J. Bryan, the standard bearer of the Democracy. In 1893 he went to New York City, where he was located for five years, being vice president of the Hudson River Stone Supply company. He was also one of the directors of the New York Steam company. In 1898 he returned to Johnstown and has resided between that place and Centerburg ever since.

At present Mr. Alsdorf is engaged in the hay, grain and general elevator business with a number of others, and they have elevators at Johnstown, Croton and Centerburg, doing an extensive business.

Mr. Alsdorf is also quite a prominent fraternal man, being a member

DEMOCRATIC CHANCES IN OHIO

(Cincinnati Enquirer.)

There has never been a year for many decades when there was such a separation of state and national politics as is apparent this year. This is a very auspicious omen for the good of the people of the states. The quickening of the interest of the electors upon state and local questions is the safety of the state, and constitutes the strength of the Union.

In our own Ohio, from lake to river, there has been inaugurated a state and local contest that if there were no Presidential election would bring a tremendous vote to the polls, and taken in conjunction it bids fair to place on record the largest vote ever cast in the state.

The Republicans of Ohio cannot expect the great majorities of the last few years in any event. If there were no state questions involved, if the election was held with simply existing business conditions, they could not expect to retain the favor of the electorate as in former years.

Times, it is true, are growing better, but it is a slow improvement, and the depression is called by the masses "a Republican panic." There are not the activities of 1898 to 1907 prevailing, and the party in power is held responsible for the slump. In addition to this there is confusion of tongues on Republican doctrines and a division of thought as to present and future lines of the party's course. The Republican majority on the national ticket in Ohio will be greatly reduced conservatively speaking; some radical observers opine it will cease to exist. Whatever the electoral result

may be, there is abundant reason to believe that the Democratic state ticket is stronger today before the people of the state than is the Republican state ticket.

Admit that party lines are badly broken, the fact remains that in the cities of the state far more Republicans are openly adverse to their own ticket than can be found Democrats who are changing their positions.

In 1905 Pattison was elected Governor over Herrick by a plurality of 42,647 in the state. Herrick carried Hamilton, Montgomery and Franklin counties, and only lost Lucas by 300 votes.

Many men familiar with Ohio political conditions, and some of them of Republican faith, are confident that Harmon will carry all these four important counties by heavy majorities, and thus pile up an aggregate vote that it will be impossible for the Republicans to overcome. In the other counties of the state Pattison's plurality ran up to nearly 50,000, and in a score of these counties there is much evidence that Harmon's vote will exceed that of Pattison.

We speak of Harmon as the head of the ticket, and have full confidence that the entire state ticket will receive the same heavy vote as he candidate for governor. Every county in the state exhibits Republican losses on state issues, losses so heavy that to win the Republicans must gain many thousands of Democratic votes. They cannot win with their present strength, and their Democratic reinforcements are not in sight.

THE REPUBLICAN ACROSTIC.

Taft
Always
Favors
Trusts.

of Newark lodge, No. 97, F. & A. M., the Knights of Pythias lodge of Johnstown and of the Newark Lodge of Elks.

He is a man well versed in public affairs, has devoted much time and thought to the important question of taxation and is in every way well fitted for the responsible duties devolving upon a State Senator. If elected, which he surely will be, he will give a good account of himself and prove a highly useful member of the general assembly.

CAN'T MAKE IT WORSE

Here is a little sample of campaign literature appearing in Republican papers:

"No voter can afford to take any chance of casting his vote against William H. Taft or any candidate on the Republican ticket for Congress, if he has his family's welfare at heart. Mr. Voter, you cannot better your condition by voting for a Democrat for president and a Democrat for Congress."

That kind of "dope" has been given to Republican voters regularly in every campaign for the past dozen years.

Well, let them look at their condition now and see how they like it. If they "can't make it better" it is a cinch that they can't make it worse.

WHY NOT BOLT ALL OF THEM?

(Columbus Commonweal.)

The Cleveland Leader has bolted Green and given its reasons. They apply equally well to other candidates on the ticket. If Green, why not Pullington? If Pullington, why not Denman? If Denman, why not Harris? Logic is logic. They are all smeared with the slime of the boss.

ESTABLISHED 1876.

Bentley's White Lily Catarrh Cure has become the leader. It's a necessity now in thousands of homes because it is helpful, wholesome and clean. A scientific remedy. Strongly antiseptic and disinfectant, which renders it highly sanitary and prophylactic and contains nothing in the least harmful. No opiates, cocaine or mercury. After one trial it will make friends with you in spite of yourself. A prompt relief for sore throat, cough and colds. Ask your druggist. 25c.

PROTECTING DEPOSITS IN BANKS

An Ohio Example of Taft's Position and Oklahoma's Proof of Bryan's Position.

One of the planks of the Denver platform favors guaranteed bank deposits. Mr. Bryan addressed the Ohio legislature in February favoring guaranteed deposits. Former Governor Herrick subsequently addressed the legislature in reply to Mr. Bryan, opposing any such protection for banks and bank depositors.

Mr. Taft, in his speech of acceptance, denounced the plank of the Denver platform, which declares for a national law for national banks similar to the Oklahoma law for state banks, thereby coinciding in the views of Mr. Herrick and opposing the views of Mr. Bryan.

Below are two dispatches showing what Mr. Bryan stands for and what Mr. Taft stands for:

THE OHIO WAY.

Cleveland, O., Aug. 17.—The creditors' committee, charged with an investigation of the affairs of the defunct Farmers and Merchants' bank, the cashier of which, Henry W. Gazell, is under arrest charged with embezzlement, tonight reported that the depositors will be forced to shoulder a loss of \$415,000.

The report, made in a meeting of 2,800 depositors, charged the deficit to Gazell, alleging his speculations proved disastrous to the institution.

TAFT STANDS FOR THIS.

THE OKLAHOMA WAY.

Guthrie, Okla., May 21.—Within one hour from the time H. H. Smock, Oklahoma banking commissioner, had taken charge of the International Bank of Colgate he had authority to pay the depositors in full, though the bank's cash and available funds in other banks fell \$22,000 short of the total amount of deposits. The commissioner was able to do this under the operation of the new banking law, and this is the first time it has been called into use.

BRYAN STANDS FOR THIS.

WHICH PLAN DO YOU PREFER?

OBITUARY

RALPH ROGER CLETNER.

Ralph Roger, the infant son of Mr. and Mrs. David Cletner, of Hebron, died Tuesday morning at 6 o'clock. The funeral service will be conducted by Elder L. W. Ruffner at the Licking church at 2 p. m. Thursday.

FUNERAL OF MRS. COSTELLO.

The funeral of the late Mrs. Ann Costello, who died at her home, 63 South Fourth street, Monday, took place at St. Francis de Sales church Wednesday morning at 8:30. Interment took place in Mt. Calvary.

DEATH OF CHILD.

Word was received here by Mrs. J. T. Goodwin announcing the death of little Virginia Bess Waterman, aged three years, daughter of Mr. and Mrs. E. A. Waterman, in Arnheim, Holland, August 28. Mr. and Mrs. Waterman resided in Pugh street this city, and they were visiting the parents of Mr. Waterman in Holland at the time of the child's death. It is not known

Another Plant For Sale.

A recent newspaper item dated at Festus, Mo., reads thus: "The city council of Festus has offered to sell the city electric light plant to a St. Louis syndicate for \$10,000, and it is believed the proposition will be accepted by the syndicate."

It gives eczema, itch or salt rheum sets you crazy. Can't bear the touch of your clothing. Doan's Ointment cures the most obstinate cases. Why suffer. All druggists sell it.

Evils of the Black-list and the Boycott.

By Justice DAVID J. BREWER, United States Supreme Court.

HERE are certain individual rights, the right to life, liberty and the pursuit of happiness, and they are rights which belong to every individual in this broad land.

THERE IS NO CROWNED HEAD IN THIS COUNTRY WHO CAN SAY "I AM THE STATE."

THE ONLY THING WE HAVE TO FEAR IS THAT MAJORITIES WILL GET TOGETHER AND FOR BUSINESS OR COMMERCIAL OR INDUSTRIAL REASONS WILL CRUSH OUT THE INDEPENDENCE OF THE INDIVIDUAL.

Nothing appeals to me so strongly as calling for the combined action of every true American to preserve these inalienable rights. The spirit of liberty prevails here. No majority and no power compels you to remain here or do anything against your own reasonable wishes.

Now we have both capital and labor demonstrations of different character in this country. There are vast combinations of capital which exist. It is not fully known, and probably never will be known, just how many business men are compelled by these combinations to join them. If the business man will not join they arrange to undersell him and break up his business.

IT IS NOT PHYSICAL FORCE AND COERCION, BUT WHEN ARRANGEMENTS ARE MADE BY WHICH A MAN'S PROSPERITY IS SWEEPED AWAY FROM HIM UNLESS HE JOINS A COMBINE THE FIRST PRINCIPLES OF THE DECLARATION OF INDEPENDENCE HAVE BEEN VIOLATED AND A BLOT HAS BEEN CAST ON THE NAME OF AMERICAN LIBERTY. I DO NOT CARE WHO DOES IT OR WHAT COMBINATION IT IS, IT IS A DISGRACE.

The same thing is equally true of labor. There is nothing more wholesome than the collection of labor into union or organizations. It tends to give them higher wages, better standing and countless other advantages, and of this I most heartily approve. But when any body of laborers say to one man in that same branch of endeavor, "You must join this organization or you won't be permitted to work anywhere," and resorts to violence or boycotting or anything that cuts that man out from pursuing his happiness in his own way, I say that organization also has insulted the name of American independence.

LET THE TIME COME WHEN ANY ORGANIZATION CONTROLS BOTH CAPITAL AND LABOR, AND THE GOVERNMENT FOR WHICH OUR FATHERS DIED WILL VANISH FROM THE EARTH.

TEACHERS' INSTITUTE

(Continued from Page 1.)

as regards the teaching profession. There are two adjustments which the school must make—a bending down to the child, and a dignified adjustment to the changing conditions of our social life. Administrative method is the reflection of social condition, measured by what the community is willing to sacrifice for what it says it believes in. Society is interested in the transmission of its ideals and truths, not only in the spirit, but in the letter. We do not care so much about the form of truth, as about the essence of truth. We must recognize the teacher as a factor in transmitting social values, and that means that we must struggle against the narrowness of our professional traditions, and become men and women who understand the throbs of social aspiration in the light of careful, conscientious and continued social study.

The Wednesday morning session of the city institute was opened by devotional exercises, conducted by Rev. J. A. Bennett of the Fifth Street Baptist church.

Miss Newlin was the first speaker, with the subject, "The Relation of Reading to Literature," dealing with the function of expression in the reading lesson. She urged, as the keynote in the work, detail, or getting the inner meaning of the phrase—getting each thought or part of a thought, and placing it in its correct relation in your own mind.

Reading aloud compels closer attention of the child to details, and so is a test as to whether he understands what he is reading, and also opens his mind to new experience. The value of vocal interpretation lies in showing whether the pupil has gotten the right relations—if not that, he has gotten nothing. Knowing the words, and how to pronounce them, is no proof that the child is an interpreter, and knows how to read.

Then reading aloud helps the child to experiences that he might otherwise never come into contact with. Every experience that has ever occurred to the human heart and brain, has been recorded in literature. For instance, no one can enter into the life and emotions of Maggie Tulliver without being the richer for it.

Dr. Luzzolli, the second speaker, in preliminary, briefly reviewed the fundamental idea of his first lecture, the relationship between the theoretical and actual esteem accorded the teachers' profession, with its suggestion of certain fundamental principles—the conception of higher civilization as a spiritualizing of men and women, the determining influence of social conditions, interpreted in terms of all human history. Society in its broadest experiences, is the determinant of what the school must be; and so we need to impose, not only broader human experiences, but to substitute, where this cannot be, a broader, more vicarious sympathy with social institutions.

The great function of the educational system is social control. It comprises the placing of sentiments and ideals within the child without coercion, without dominion of author-

ity, the cultivating of the higher potentiality in the human spirit.

What is the nature of the school as an organization? Certain currents of controversy are crossing our educational systems, and must be considered. There is the tendency to impose absolute uniformity throughout one school system, one of the most serious mistakes of our system. It is idle and wasteful to try to utilize uniform systems with children of varying equipment—it is the aim, not the system, which should be uniform, as a principle and method valid in one community, would be altogether useless in another. A careful recognition and discrimination of conditions is necessary. We need more brain power in supervision, and less mechanical.

While the school is not reformatory, it is progressive; it has the right to adapt old traditions and moralities to new situations, giving them more expanded values.

Dean Henry G. Williams of the State Normal School, Athens, was the third speaker of the morning, and announced as his subject, "The Educational Value of the Ideal"—dealing, as he said, not with what men have achieved, but with what man has dreamed that he would like to do.

He gave as his definition of an ideal, man's consciousness of what he would like to do; while education was defined as a process of individual growth and development, by which the individual is developed, and the race civilized. So the purpose of education cannot be knowledge merely. For the doing is more important than the knowing; more functioning along the line of proper doing, and the converting of means into ends, is the real business of the school. Teaching is causing another to know what he ought to know, do what he ought to do, be what he ought to be.

The final aim of education is that through education character may be developed, and so character must be our ideal.

We build our own ideals out of the best elements of character that we, as individuals, know. Our ideal is changing every day, so long as we are really living. The character for which we are pleading must be a positive kind of thing, that will make the world a little better. The boys and girls should leave our schools feeling that for each one of them there is a work in the world that has not yet been done, and then they will have the goodness that results from a high ideal of character. "The ability to ring the rising bell in the dormitory of the soul" is the greatest ideal that the teacher can ever hope to attain.

DIVORCE

IS SOUGHT BY WIFE OF DR. CHAS. A. HATCH ON STATUTORY GROUNDS.

Juvenile Court, Appointments, and General News from the Various County Offices.

Annie G. Hatch has commenced a suit in the Probate court for divorce from Dr. Charles A. Hatch. Plaintiff in her petition, says that she was married to the defendant on June 18, 1877, and that two sons were born of the marriage one of whom Dr. Clark B. Hatch, is now living. For cause of action plaintiff charges defendant with gross neglect of duty. She says that on September 25, 1907, defendant, without any just cause or provocation on the part of the plaintiff, left and abandoned her, and has since remained away from her without making any provision for her. She therefore asks for a decree of divorce. Edward Kibler, attorney for plaintiff.

Bids Opened.

Engineer Jackson estimates that it will require fully 3,000 cubic yards of earth to make the fill at the new Church street bridge. In accordance with this estimate, bids for the work were opened at the county commissioners' office Wednesday afternoon. There were four bids for the work as follows: A. R. Pitzer, 40 cents per cubic yard; E. E. Shafer, 33 9-10 cts. per cubic yard; D. Colville, 45 cents per cubic yard; L. B. Wilson, 38 1-8 cts. per cubic yard.

Juvenile Court.

In the juvenile court Tuesday was heard the case of the State of Ohio vs. George Layton and wife, of Utica, on the charge of neglecting and abusing the little daughter of the former, Esther, aged five years. After hearing the case the court ordered the child taken away from the father and step-mother and given into the custody of an aunt, Mrs. Oliver Cass of this city.

Will Examined Treasury.

Tuesday, in accordance with the requirements of the statutes, Probate Judge Brister appointed two citizens of opposite politics to make the semi-annual examination of the county treasury. The men appointed were Messrs. Harry Baird of Pataskala, and George E. Beck, of Newark. They entered at once upon the discharge of their duties.

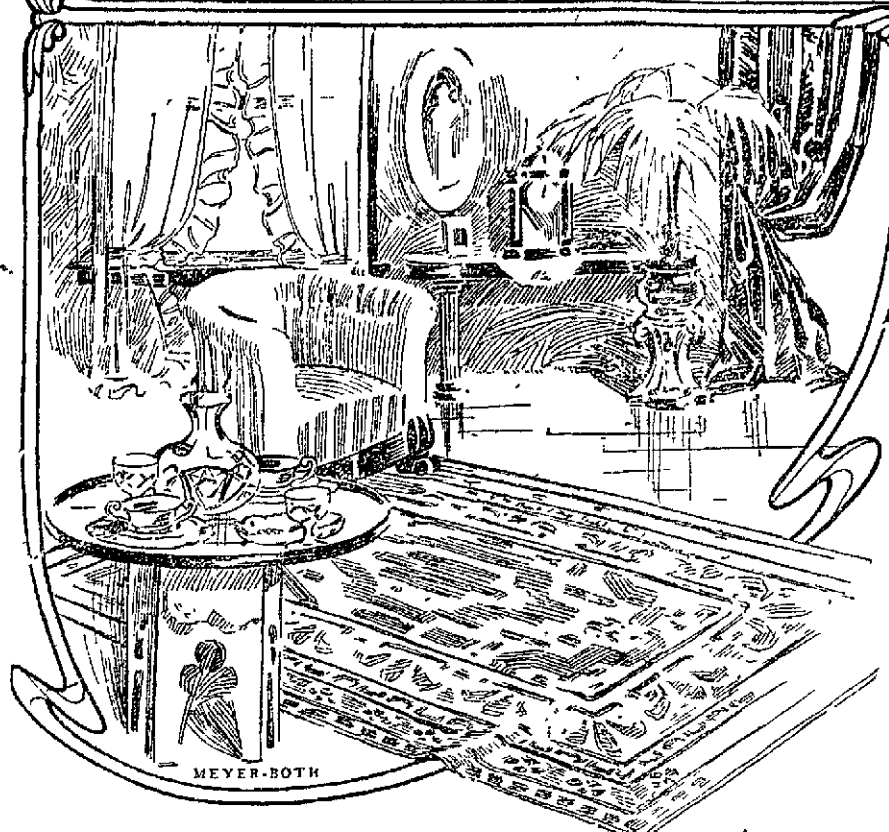

Appointed Administrator.

Laban McDonald has been appointed administrator of the estate of Nelson Hoadley, deceased, of Fallsbury township. Bond \$2000.

Preliminary Application.

A preliminary application was made in the Probate court Tuesday for the

CALIFORNIA'S WORLD FAMOUS BIG TREES THAT WERE ATTACKED BY FOREST FIRES.

News that forest fires were invading the Calaveras group of big trees in California sent a pang to the hearts of thousands of tourists who have seen these famous world wonders. All the forest rangers and residents of the district went forth to protect the monarchs. The great fallen bulk known as "the Mother of the Forest," 327 feet long and 78 feet in circumference, was in the path of the fire. The destruction of the big grove would be little short of a calamity. The only living specimens of the Sequoias gigantea, or big trees, are those found in California, and there are only four groups of these, containing many notable trees. The Calaveras grove is probably the most remarkable of all.

probate of the last will and testament of Jane Dodd, deceased, late of Hopewell township. The hearing was set for Friday, September 25.

Answer Filed.

In the case of the Mohine Plow Co. vs. Alva H. Varner and others, the defendants have filed their answer. Defendants say that in 1905, they ordered and purchased from plaintiff a large bill of goods which plaintiff accepted and promised to deliver in time for the season in the goods which was the following spring. The plaintiff failed to deliver the goods as defendants' damage in the sum of \$1000. Defendants ask that plaintiff's petition be dismissed and that they have judgment against plaintiff for \$1000 and costs. Smythe & Smythe attorneys for defendants.

Reply Filed.

In the case of the Pataskala and Hebron Telephone company vs. H. Dean Ashbrook, the plaintiff has filed its reply to the answer of the defendant in which it denies each and every allegation contained in the answer which is not an admission of facts alleged in plaintiff's petition, or which is inconsistent with the allegations made in the petition, and says that the same are untrue. When the plaintiff

Avoiding Class Government.

We are trying to steer a safe middle course which alone can save us from a plutocratic class government on the one hand or a socialistic class government on the other, either of which would be fraught with disaster to our free institutions, state and national. We are trying to avoid alike the evils which would flow from the government ownership of the public utilities, by which interstate commerce is crippled on and the evils which flow from the riot and class of unrestricted individualism.—President Roosevelt.

Clearly Stated.

The advocates of municipal ownership usually forget to include as an item of expense when making a showing in regard to the profits of such institutions the taxes the city loses because of its ownership of the plant. When a city does not own a public utilities plant, that property pays taxes to the city. As soon as a city buys such a plant this source of income is cut off. The loss of taxes is therefore very profitably chargeable to the plant as a city expense. How often is this done? Do you at (a) Times

AT THE GRAND.

Beauchamp and Aubrey, the comedy acrobats and trick jumpers are making a great hit at the Grand this week, being exceptional artists in their line. New illustrated songs and new moving pictures tonight. Admission 5 cents.

They Think They Know It All.

The city council hired an electrical engineer to advise them and to draw the plans and specifications of the municipal lighting plant. When the job is completed that gentleman will have been paid \$1,000 or more. In the face of this expenditure a majority of the council voted directly opposite to his recommendations. In other words, they paid \$1,000 of the people's money for expert advice, and then they did the other thing. He advised them not to buy the system that they put in, as did others who ought to know.—Ligonier (Ind.) Banner.

"My child was burned terribly about the face, neck and chest. I applied Dr. Thomas' Electric Oil. The pain ceased and the child sank into a restful sleep."—Mrs. Nancy M. Hanson, Hamburg, N.Y.

WEDDINGS

WELSH-SULLIVAN.

On Sunday evening at 6 o'clock at the parsonage of St. Francis de Sales church, occurred the marriage of Mrs. Anna Sullivan and Mr. Dennis Welsh. They were attended by Mr. and Mrs. Claude Garrison. After the ceremony they returned to their home on German street, where they received the congratulations of their friends, after which they repaired to the dining room, where supper was served. Those present were Mr. and Mrs. Welsh, parents of the groom, Mr. and Mrs. Claude Garrison and son Wayne, Miss Elizabeth Sullivan, Master Lucius Sullivan, Mr. and Mrs. Will Sullivan, and Mr. and Mrs. Hopp.

PECK-CONNORS.

Otus A. Peck and Miss Letitia Connors, both of this city, were married Tuesday evening. The ceremony was performed by Justice M. O. Nash at his home, 14 North Fifth street, at 8 o'clock in the presence of several witnesses. They have the best wishes of all their friends.

Newark 7, Marion 2.
Lancaster 5, Lima 0.
Mansfield 4, Portsmouth 3.
Portsmouth 2, Mansfield 1 (7 innings).

Lima at Newark.

Portsmouth at Marion.
Lancaster at Mansfield.

A very fair sized crowd of the loyal fans were on hand yesterday afternoon to see the Marion Diggers for the last time this season, and they also had the pleasure of seeing Tom Quailey pitch a mighty pretty game, and win it through the support of the rest of the Molders, though Tom himself was a big factor in pulling the contest Newarkwards, for aside from his handy work and good control, he rapped out two clean singles, scored a run, and might possibly have had a second count to his credit if Wratten had taken a chance in the eighth and sent him home when Pinkney laced the globe out through center field. But the game belonged to Newark by the safe score of five runs, and Wratten hoped McClintock would score him, although Mac had three hits to his credit already.

Brown was the Marion offering, and O'Day sent him in to do the heavy shingling act, but Brown was easy money, and he was rapped often and hard and when his brought in runs. His support was also ragged and the bad throw of Wolfe's and the passed ball of Luskey's each saw a runner count. The runs that came in through clean hitting were enough to safely stop the game away, and Brown can't blame any one but himself for the dropping of the last game with Newark this year.

The Newark squad played an entirely different article of ball than that they dished up in the Labor Day games, and the fans were treated to some beautiful fielding in which the Molders had entirely the best of the honors. The head work and the general ability of the locals was never better demonstrated than in the sixth inning when Quailey got into a very tight hole. Twice during the inning the bases were full, one with no outs, but through his own efforts and those of his teammates he managed to extract himself without a runner crossing on him.

Wratten, McClintock and Pinkney easily carried off the fielding honors of the day, and their work was nothing short of marvelous. Their fielding was fast and clean and their throwing deadly, and to their work is due the credit of winning the third of the series from the callers.

Newark started off with a vim in the first inning, and enough runs crossed in that one frame to have won the game, but not content with those, and not being able to dodge some of the balls Brown dished up had they cared to, they counted four more times with the greatest ease. Pinkney led off with a single but was thrown out at second on McClintock's attempt. Wratten, Abbott, and Mac then came on, and with the two men out Quailey laced out a single into left that brought the clever little shortstop home.

Smith was hit and Gygil reached second when Luskey let one get by him. Gygil scored and Smith reached second. Wratten's single drove home the winning run. Winters was hit and then he was out. Luskey could not get the ball to either third or second. Wratten and Winters worked the bases, and both were safe. Winters was hit and then he was out. Luskey could not get the ball to either third or second. Wratten and Winters worked the bases, and both were safe. Winters was hit and then he was out. Luskey could not get the ball to either third or second. Wratten and Winters worked the bases, and both were safe.

TIGERS WON AND LOST.
Portsmouth, Sept. 9.—The Shoemakers closed the season at the home lot by breaking even with Mansfield yesterday. Schultz a connester from Mansfield, was tried out by Manager McCutcheon, and he was hit free in the

for two bases both runners scored. In the fifth both sides counted twice, it being the only inning that Quailey was found for a succession of hits, and up to this time he hadn't allowed the sign of a bingle.

With Ketter and Wilson out on fly balls to Winters and Wratten, Quailey poked La Rue on the wrist with a curve, and Perl trotted to first. Luskey nosed Quailey out for a two sacker down the right base line and La Rue scored. Brown singled and Luskey rounded the curve and scored. Farrell then hit one to McClintock that retired Brown at second, and the only chance that the Diggers had to score went up in smoke.

The Eells' squad then counted twice when Gygil hit one to Wolfe, who threw wild to Tate, and Gygil was safe. Smith shot out a light Texas and Gygil went to second. Wratten then made a pretty sacrifice that sent each of the runners up a base while he was being touched out. Winters crashing a single scored both Gygil and Smith, but in trying to reach the second base he was thrown out by Luskey.

Things looked rather bad for Tom in the sixth, for twice in this inning the bases were full, but wonderful work on the part of his backers, and a strikeout by himself sent them off the field without the coveted scores. Wolfe met the ball full on the nose and reached the second station, and O'Day was then walked. Tate hit a long one to Smith who made a great run for the ball, but juggled and finally dropped it, though his recovery was so rapid that the runners could only advance a base. Ketter hit a stinger to Wratten who knocked the drive down and threw Wolfe out at the plate. Wilson let victim to the head work of Quailey and whiffed out. La Rue then hit a stiff one through Quailey, but the ball was stopped by a wonderful one handed jab of McClintock, who retired the runner at first though the base was almost obscured by dust. After this inning, Quailey, seeing the support that was given him, turned on the speed and after this things were all coming his way.

In the seventh, though he allowed a hit and walked a man, he struck out the necessary three that retired the side. A fast double and fast work in the remaining inning closed the scoring game for Marion. Newark took things rather easy for the last few frames, for their lead was a comfortable one and they had more than enough to close the last of the Marion series.

Portsmouth, Sept. 9.—The Shoemakers closed the season at the home lot by breaking even with Mansfield yesterday. Schultz a connester from Mansfield, was tried out by Manager McCutcheon, and he was hit free in the

first game but allowed only three scratch hits in the second. Scores:
First game—
Mansfield . . . 10 10 0 0 1 0 1 1 1
Portsmouth . . . 0 0 1 0 0 0 2 0 3 8 0
Batteries: Bailey and Breyer; Schultz and Connally.
Second game—
Portsmouth . . . 0 0 1 0 1 0 1 0 2 5 2
Mansfield . . . 1 0 0 0 0 0 0 1 3 1
Batteries: Schultz and Connally; Bucholz and Harmon.

THREE TIMES SUCCESSFUL.
Lancaster, Sept. 9.—For the third time this season Walter Justice worked in a no-hit game, shutting Lima out without a bingle and striking out 15 men. Only two men reached first base, getting there on bases on balls, while only two balls were knocked out of the diamond.
Lancaster . . . 1 0 0 2 0 0 0 2 5 8 0
Lima . . . 0 0 0 0 0 0 0 0 0 0 1
Batteries: Justus and Fox; Linke and Reilly.

LAST WEEK OF BASE BALL

Lovers of the Game Should Turn Out and Root for the Home Team.

The fast Lima team will be here on Wednesday, Thursday and Friday. Portsmouth Saturday and Sunday. Only Five More Days Until Season Closes.

TWO SORTS OF DISCONTENT.

One Upbuilds, While the Other Retards Civilization and Progress.

Intelligent discontent is one of the prime factors of progress. It goads men and nations to new attainments. It asks for and secures a Magna Charta in one century, a bill of rights in another. It is the mother of invention and the guardian of liberty. It lays its finger upon an economic wrong and rights it. It fixes its eye upon a distant goal and does not stop until it reaches it. It does not follow will o' the wisps to death in the morasses of political charlatanism, nor does it waste its time in hunting for pots of gold at the foot of economic rainbows.

Unintelligent discontent strikes with its eyes shut and wounds friend and foe indiscriminately. It is the terror of the true statesman, whose plans for economic progress it defeats through its very impatience, but it is the delight of the demagogue, who fattens its fickleness. Like the dog in the fable, it is ready to drop the meat in its mouth for the shadow piece in the pool. It strives to kill the goose that lays the golden eggs in order that it may acquire a larger share of wealth that is yet to be created.

We are all rightly discontented with some of the results of corporate control of industry and of public utilities. The intelligent seek relief through publicity and regulation, conserving the individual enterprise that has wrought our civilization. The unintelligent snatch at the quick cures of public ownership and socialism.

A DEFINITE DIAGNOSIS.

Co-operation Baiting a Direct Cause of Business Stagnation.

In accepting the Democratic nomination for the governorship of Georgia Joseph M. Brown, after describing the manner in which business and industry had passed from boom to stagnation in Georgia in one short year, said:

"What was the cause of this paralysis of business? Agitation—agitation which denounced the corporation, but ignored the fact that the corporation was but the union of individual citizens who singly were too weak to accomplish the purposes of development which with aggregated capital could build and was building up the state, giving co-ordinately employment to thousands of the worst of our fellow citizens. This agitation declared that 5 per cent net was a fair return for those of our fellow citizens who invested their money in stocks of common carrier corporations, but granted to those who owned stock in other corporations the right to earn from 20 to 100 per cent net. It manifestly took no account of the fact that if the officers of public utility corporations were handling the affairs of these corporations in such a manner as was detrimental to the public interest the just method of correcting such abuses was to deal with such officers, but not to inflict a penalty, through serious curtailment of income on their investment, upon innocent stockholders of properties which pay one-eighth of the taxes of Georgia."

Colon tried to line up now with right-wing cats.

TWENTIETH

Week Shows Six .300 Sluggers Survive—Newark Has Ten Men Batting Over .200.

The close of the twentieth week in the Ohio State League shows seventeen players batting better than .200, with Channell of Mansfield, leading the bunch. Tate of the Marion aggregation, has taken a brace and occupies second position. Following is a general summary of the standing of the league batters:

Player—Team.	G.	AB.	H.	Pct.
Channell, Mans.	121	414	132	.321
Tate, Marion	132	475	151	.317
Ketter, Marion	128	469	147	.313
Jewell, Mans.	112	435	136	.312
Bailey, Mans.	41	102	31	.303
Phelan, Mans.	70	20	6	.300
Burke, Ports.	62	230	64	.291
Parsons, Lima	14	45	13	.288
Heller, Lane.	133	490	137	.279
Craig, Marion	28	86	24	.279
Jaeger, Lima	36	119	33	.277
Mathay, Mans.	105	383	106	.276
Pinkney, Newark	129	405	29	.276
Locke, Newark	127	473	128	.269
Carter, Lane	137	519	139	.267
Lloyd, Mans.	48	133	35	.263
A. Reilly, Lima	127	364	122	.262

As a team Newark is batting as follows:

G.	AB.	H.	Pct.
Pinkney	29	105	.29
Locke	127	473	.269
Snyder	102	357	.260
Gygil	123	444	.247
Abbott	135	512	.244
Smith	138	460	.241
Wratten	124	409	.232
McClintock	36	124	.232
Webb	32	94	.223
Winters	87	245	.223
Williams	87	242	.216
Moore	33	97	.217
Quailey	31	73	.210
Eells	14	29	.194
Kabler	17	38	.192

"STAR BRAND SHOES ARE BETTER." STEPHAN'S DEPT. STORE.

CENTRAL

O. P. and West Virginia Leagues Close—Four More Days in the O. S. Circuit.

The Central league closed its season Tuesday, with Evansville an easy winner of the flag. Dayton was a strong contender for awhile but fell down towards the last and the Hoosier club passed them. The fight in the Central was for a while this season, one of the prettiest in all organized leagues. Zanesville finished in fifth place, and the club in that town was rather a costly affair. The owners probably will not give out a statement of expenses for the season, but there are a number of people interested in the game in that city who think Zanesville should be in the O. S. State instead of the Central, and their idea may prevail.

The Ohio and Pennsylvania league, the circuit that figured on a higher rating and lots of other funny things, went up higher than a kite, Labor Day and Akron had the rather doubtful honor of winning the pennant. Baseball, from a financial standpoint, has been a very great failure in that league this season, and the facts seem to show that the Western cities of the league have held the circuit together the last two or three seasons. The Akron Beacon Journal says that it is very doubtful that there will be baseball in that city next year, for the club this year was a very costly investment, and while the Akron team was in first place and a sure winner in the flag, yet their attendance on big days was almost equal to the crowds that went out to week day games in the O. S. league. The "little league" "rebels" and numerous other things that Marion, Mansfield, Newark and Moore were called for breaking with the Eastern clubs, have sailed along in nice shape, and with Lima and Portsmouth, they formed a league that was the envy of many others in organized ball. The O. S. will be on the map next year, and two other cities will be included, but they will have to prove their worth, for the present towns are in a position to demand this, for playing baseball will be played and no "dead ones" are wanted.

President Morton managed to get in badly with most of the clubs in the O. P. this year, and if by any possible chance they should have a circuit up through that section of the state next year, it is dollars to doughnuts that Morton will not be the high official.

Henry Truby, who is now umpiring in the O. S., is an old ball player, and formerly played second base with Pop Anson when he was at the head of the Chicago club. He has given general satisfaction since joining Quin's staff according to other papers over the circuit.

Umps Hart was "knocked from the box" in the second inning of yesterday's game. Twice during that frame he caught two foul tips, then throwing off his mask and protector he went behind the pitcher to umpire the rest of the game. When Luskey was also stung with a foul, Hart called, "Come out here Charlie," and the crowd all laughed.

Ed Asher watched the game from the press box, and his rooting undoubtedly did much towards pulling the first three runs across. Asher left last night for Indianapolis to join the Toledo team.

George Kaler was booked to work yesterday, but the night before he was out with some lady friends and ate so many doughnuts that he was in anything but good shape to work the game, so Quailey was sent in out of his turn. He proved a mighty good selection, too.

The Molders seem to have it on Luskey, and in the three games they stole ten bases on him. That double steal yesterday was one that the fans could fully appreciate, too.

West Virginia league closed Labor Day with the Uniontown club the flag winner. Ferd Drun's Clarksburg team finished second.

Bob Williams is catching much better ball now than he has all season, and his pegging to second is also improving. He ought to play good ball next year.

Lancaster as the pennant clincher, and should she lose all the rest of her games, one on Saturday and two Sunday with a good lead. The fight for second place is still uncertain.

On this trip to Newark the Diggers wore white uniforms that were very similar to those worn by the Newark team.

Only four more days of baseball, and the schedule of 150 games will have been played. The fans in Newark would like to see the season go on at least a month longer, for it's a long time before next spring.

Lima is here today and will play the Molders on Thursday and Friday. Portsmouth then comes for three games, one on Saturday and two Sunday, when the season will close.

The long looked for race between Webb, Moore, Winters and Williams was pulled off yesterday before the ball game, and the question is now settled as to which man of the four is the fastest on his feet. Winters won but just by a nose, for the others were

Say It

Headaches. Biliousness. Constipation. Ayer's Pills. Sugar-coated. Easy to take. Don't forget.

pressing him close, and the race was so close in fact, that Moore claims he would have won if some one of the others hadn't split in his eye and caused him to lose his stride.

Tomorrow will be ladies' day at the ball yard, and there should be a big turnout, for it will probably be the last free day for the women this year.

First Baseman Spencer of Portsmouth, has been purchased by Armour for the Toledo club. He reports today at Indianapolis.

NATIONAL BISCUIT COMPANY

NEW USE FOR HICKORY

Noiseless Wheels to Be Made From Tree Stumps.

PROCESS PREVENTS RATTLE.

East St. Louisan Provides Market For Bane of the Farmer's Life—All the Butts In Sight Are Being Busily Cornered.

A corner in hickory stumps is in sight. E. C. Sendelbach of East St. Louis threatens to buy up all of the stumps and make wheels out of them. He has a patent on the idea. If Sendelbach's idea is successful, he expects to use all of the tree except the sap.

Heretofore the stumps have been a waste and a bother. They stubbornly held their ground and were in the way when the soil was opened for cultivation. Modern methods may put an end to the stump nuisance. With the short cuts from the stumps Sendelbach, according to the St. Louis Post-Dispatch, says he can make as good wheels as are made and will do away with the rattle. The tires will not have to be set every time there is a dry spell, he says.

Nowadays the rim of an ordinary buggy wheel is made from pieces six to eight feet in length, requiring choice cuts of timber. When the spokes become worn and the rim gets dry and loose it causes the familiar rattle. A visit to the blacksmith shop and a tedious wait until the tires are set is about the only remedy.

By the stump method the rim will be made of short pieces from six to ten inches long, fitted into iron flanges at the end of each spoke. The iron will not dry up or warp; hence there will be no rattle. The short cuts will also make the wheel much cheaper to manufacture, it is said, and the longer lumber can be used for other purposes. Mr. Sendelbach has ordered an equipment of special machinery costing \$150,000 for sawing the stumps and making the wheels. Sawmills he owns in Illinois and Arkansas will supply the lumber from the stumps he purchased in that territory.

Sendelbach now has representatives in Illinois, Indiana, Missouri, Arkansas and eastern states buying stumps by the acre. Automatic machinery will be used to pull the stumps from the ground. The farmer can then plant his crop without annoyance from the vexatious stumps.

The stump cuts can be utilized in making all kinds and sizes of wheels. Sendelbach says. Samples are now being made for two St. Louis breweries and the New York fire department for an experiment as to their commercial value.

WASHBURN-CROSBY CO.

THE VERY HIGHEST QUALITY

AMUSEMENTS

THE PRESS AGENT SAYS:

In other cities where John W. Vogel's Big City Minstrels have appeared, theater parties have been a social feature of the event. It is a jolly way of enjoying a perfect evening and witnessing what is said to be the best dressed and most elaborately staged minstrel performance in America.

The above organization will appear at the Auditorium theater tonight and the demand for tickets indicates an unusually crowded house.

Another packed house at the Auditorium last night. The Dramatone company has certainly caught on here with the talking pictures. The Vandeville numbers are also above the ordinary, in fact the whole show is the best ever seen in Newark at the price. Miss Josephine Crawford will appear Thursday evening in her famous burlesque on the popular sheath gown, so come prepared to laugh.

Jule Walters and Louise Lovell, stars of that popular melodrama, "Side-Track," are at the Orpheum Thursday, Friday and Saturday. Also Jimmie Wall, the black face comedian, who has played Newark a number of

guests of the former's brother, Geo. Richcock, and family.

Mr. and Mrs. Mark Edman were guests of the latter's uncle, Ira Miller, and wife, near Martinsburg, Sunday.

Miss Burdelle Marriott was a guest of the Misses Gardner from Saturday until Monday.

Mrs. Pearl Dush and daughter, Indus, of Newark, are guests of her father, G. W. Marriott and family.

Frank Hawke attended the state fair, Friday and spent the night with his friend, William Dierdorff of Columbus.

Dane and Jesse Hawke attended the ball games at Perryton Labor Day.

Mrs. G. W. Marriott spent Monday night and Tuesday with her father, James Lyons, who is ill at his home near Utica.

William Jones purchased a new buggy, Saturday.

Miss Kit Hawke has resigned her position with the Pope-Gosser China company of Coshocton, and is taking the course at the Bliss business college in Newark. She spent last week with her parents, Mr. and Mrs. James Hawke of this place, and returned to Newark, Sunday, accompanied by her father, who was in the city on business until Tuesday.

Experience Essential.

On the semimunicipal ownership street railway of Cleveland if you offer a five dollar bill in payment of fare the conductor pockets it and tells you to apply at the office of the company for your change. This is bad enough for the man who has more bills in his pocket and plenty of time to chase up his change, but if you haven't another cent to bless yourself with and happen to be miles from home and from the traction office it may be a serious matter. The Cleveland Plain Dealer calls it highway robbery and intimates that practical experience as well as good intention is necessary to run a street railway properly.

HARRY LAUDER WHO GETS \$5,000 A WEEK ON STAGE.

ROMANTIC AND HISTORIC SPOT IS RAIN ROCK

Pleasure Resort Which Has Been the Scene of Many Merry Makings, Favorite Camping Ground.

No more beautiful or romantic spot is to be found in Licking county than the Rain Rocks in Eden township, in the Rocky Fork region. The natural scenery is picturesque, and in many places approaches the sublime. All along Long Run through Mary Ann and Eden townships, in every successive mile, the beholder is filled with wonder and amazement at the new and varied phases of Nature's face. Coming up from the south along the stream, over a narrow, winding mountain road you come face to face

Photo by Ernest Thoma

with the "Picture Rocks." Turning to the right a little south of "Picture Rocks" a narrow winding by-road leads over the hills to the Rain Rock, which is located in the midst of scenery so wild and rugged as to attract pleasure parties from Newark and other places. It is a spot of natural beauty, and is a great resort for reunions and family gatherings. Nothing of special importance is observed from the roadway, which passes directly over the top of Rain Rock. Descending to a gloomy gorge, filled with trees and flowering shrubs, with huge sand rocks piled promiscuously about on the hill sides, a place that can only be reached by a footman, the Rain Rocks and their accompaniments come into view. This is merely a huge, seamed sand rock that juts from the hill side, over which the road passes, extending into the gorge thirty or forty feet, is under surface, so much of it as can be seen, being about one hundred feet long by thirty or forty feet wide. This surface appears elevated, at the highest part, some twenty feet or more above the surface of the ground beneath, but sloping slightly until it rests upon a solid wall of sand rock that supports it. It forms a gloomy, cavernous-looking excavation, and a shelter where five hundred people or more might escape from a storm. In various places through the crevices of this rock-roof clear, sparkling spring water issues, and keeps up an incessant dropping, year after year, upon the sand beneath, hence the name, Rain Rock. In winter this dripping water forms icicles, often reaching from the ground to the surface of the rock, making very beautiful pyramids of ice. This is also a noted pleasure resort. Pleasure parties from Newark and other places sometimes camp out here for days, and ramble among these picturesque hills. Meetings of various kinds are also held here, and rude plank seats are arranged for the accommodation of an audience in front of which, at a little distance from Rain Rock, is a flat rock, four or five feet high, and ten or twelve feet in diameter across the top, with a smooth surface, known as "Pulpit Rock," upon which the

speaker stands, and upon which several chairs may be placed for the accommodation of distinguished visitors. In the rear of the "audience room" and fronting Pulpit Rock, is a huge mass of perpendicular rocks. These are "rent and riven" as by thunder bolts; the intersices being filled with laurel bushes, and the edges rimmed with ferns, causing the mass of rocks, during the proper season, to look like an immense flower pot. It is altogether a very beautiful spot.

Can't look well, eat well or feel well with impure blood feeding your body. Keep the blood pure with Burdock Blood Purifiers. Eat simply, take exercise, keep clean and you will have long life.

NARROW ESCAPE

From Drowning Was Had by Fred Mikesell When Raccoon Creek Bank Gave Way.

Mr. Fred Mikesell, the versatile clerk at James Browne's Sons' grocery had a narrow escape from drowning recently. While fishing for bass in the Raccoon creek near the Dugway, a bank that was partially undermined gave way when Mr. Mikesell went to raise his rod and precipitated him into deep water. In the fall the debris, composed of rocks and earth, came near holding him under the water, but he fortunately got hold in his struggles of a set pole that he had previously firmly fixed in a part of the bank that did not give way, and he was able to extricate himself. Mr. Mikesell can not swim and as he was alone he had a close shave. The rocks cut his face badly and broke his nose and he is otherwise feeling very sore after his adventure.

"STAR BRAND SHOES ARE BETTER," STEPHAN'S DEPT. STORE

Spoken From Experience. A private company can get better results than can be obtained out of a municipal plant. It is not bound down by any such restrictions as the eight hour law; the officials of the company see to it that there is no waste or loafing, because it is a commercial project there is more efficiency, and as a result any of the lighting companies of this city can sell us light cheaper than we can make it. There is proof in my own office here that it costs the city more to do its business than if it were a private concern. If the finance department was a commercial house, as it really ought to be, and was under the system which prevails in large financial houses the department would cost the city just about half what it costs now.—Comptroller Metz of New York.

BISHOP WILL SPEAK AT THE ANNIVERSARY

East Main Street M. E. Church Will Have Noted Divine to Assist in Services Sunday.

The East Main street M. E. church has secured the Rev. Bishop W. F. Anderson for their anniversary service next Sabbath. Bishop Anderson was honored by being one of the first two to be elected at the General Conference of the Methodist Episcopal church at Baltimore last May. He received also, the highest number of votes cast for any of the eight bishops elected.

He was born in Morgantown, W. Va., April 23, 1860. His father came from Ireland but his mother was an American of German and English extraction. He graduated from the Ohio Wesleyan university in 1881, with the degree of bachelor of arts. Graduating from Drew Theological seminary in 1887, he immediately joined the New York conference. He served respectively the following charges: Mott avenue, New York City, Kingston, N. Y. (where he built one of the finest churches in the Hudson river valley), Washington Square, New York, and Sing Sing, N. Y. From here, in 1904, he was elected general secretary of the board of education, from which he was elevated to the episcopacy.

His wife is the daughter of Dr. C. W. Ketcham, formerly of the Cincinnati conference. They have six children ranging from 20 down to seven years of age. Their home life is ideal. Upon a farm, in a Christian home, with the family altar, the bishop was reared. He was converted at the age of 16 years in a country church during a revival of religion. Soon after this the father said: "I have brought up eight children, and I want one of them to be a preacher. I think, William, that you will be the one." William fought the idea, but when, four years later, the positive call came, he surrendered. In 1892 he received the degree of doctor of divinity from the Wesleyan college at Middleton, Conn. In 1907 the Ohio Wesleyan university conferred upon him the degree of doctor of laws. He has always been much sought after as a public speaker, but it was not until 1899, when still a pastor, he made a notable address before the St. Louis Methodist conference, that he came into great prominence.

His pleasant address and kindly and brotherly manner have won for him a well merited popularity, and he is easily regarded as one of the great speakers and leaders of the Methodist church. It will be a rare treat and a great honor to have the bishop in Newark for a Sabbath. A cordial invitation is extended to the general public to hear him.

Rev. J. E. Lutz of Ashville and Rev. J. W. Conkle of Portsmouth were guests of E. M. Larason while attending the U. B. Conference.

Miss Jean E. Moore has been selected to teach German in the Charleston, W. Va., high school. Miss Moore is the daughter of Mrs. John B. Moore of North Fifth street.

Williams' Kidney Pills.

Have you neglected your kidneys? Have you overworked your nervous system and caused trouble with your kidneys and bladder? Have you pains in loins, side, back, groin and bladder? Have you a flabby appearance of the face, especially under the eyes? Too frequent a desire to pass urine? If so, Williams' Kidney Pills will cure you. Price 50 cents. Sold by R. W. Smith, Newark.

HOME WITH MOVABLE ROOF.

Novel Feature Introduced Into Boston Men's Cottage on Casco Bay.

One of the newest and handsomest cottages on Casco Bay is that of Frank E. Thompson, the principal of the high school of commerce of Boston, which has just been finished on Birch island, Mass. The cottage is the largest on the island and one of the best arranged.

A most pleasing feature is the large living room, which takes up practically the entire first floor and is large enough for fifteen or twenty couples to dance in comfortably. A large fireplace at the end of the room adds to its attractiveness.

One feature of the cottage which is greatly appreciated by the occupants is the large flat roof over the center of the cottage. This roof is so made that while it can be used to sit on to enjoy the magnificent view it can during a hot spell be lifted up, thus giving plenty of fresh air for the chambers.

Anna Held's Narrow Escape.

Anna Held, otherwise Mrs. Ziegfeld, looking as pretty and petite as ever, who recently arrived at New York from Germany, had been through an automobile accident while abroad that nearly cost the actress her life.

"Mr. Ziegfeld and myself and our chauffeur," said the dainty Parisienne, "had just crossed the line between France and Switzerland when we became confused by the signs and did not know whether our road lay to the right or the left. We started to one side when the chauffeur suddenly jumped up and violently wrenched the wheel that Mr. Ziegfeld was operating. He turned so sharply that the machine crashed sideways against a pile of wood, and two wheels were smashed. It was hard to understand why the chauffeur had acted so until we saw the wood fall over a deep precipice which we would surely have gone over had we kept on our way."

Worldwide Craze For a Song.

The methods of the Teuton in winning his inamorata have been delineated in a quaint German love ditty which has been very popular in the United States during the last few months. It is entitled "The Glowworm" and was written by Paul Lincke, who at the present time has four different operas running in France and Germany. "The Glowworm" song has been given 2,000 times in the "Frau Luna" opera at the Koenigsplatz theater, Berlin. The song has an odd theme. The glowworm's light is invoked to lead the lovers on their dark way, and the little insect is beseeched to guide them with its twinkling "candles." A peculiar characteristic of the ballad's melody is a hoarse developed obligato running through the music. The song has been translated into no less than eight languages.

HARRY AND ANNA LADELL, In hand balancing and acrobatic tricks.

times with all the well known minstrels. Adelaide Walters, one of the best singing and dancing comedienne on the stage today is also announced for the last three days of the week. The present show still continues to make good. Tonight is the last performance for the present bill.

PURIFY.

The K. O. T. M. will give an oyster supper at their hall here Saturday night. Everybody invited.

Rev. L. G. Walker will fill his next regular appointment at Eden, Sunday morning and evening. Rev. Mr. Williams, pastor of the Hill church, will be present at the evening service, and will deliver the sermon.

Mrs. Lula Baird has moved her household goods to the home of her father, Orlando Hickey preparatory to joining her husband in Tennessee, where they will spend the winter.

Miss Leona Wilkin of Newark spent last week with Mrs. John Holton.

Miss Nellie Jones is spending the week with Newark friends.

Misses Grindie and Inez Gardner have returned home from a week's visit with their uncle Robert Gardner, and family in Mercer county, Ohio.

Mr. and Mrs. John Popham were entertained with an old-time belling at the home of the groom's parents, Mr. and Mrs. George Popham, Saturday night.

Mr. and Mrs. Will Edman are visiting friends in the northwestern part of the state.

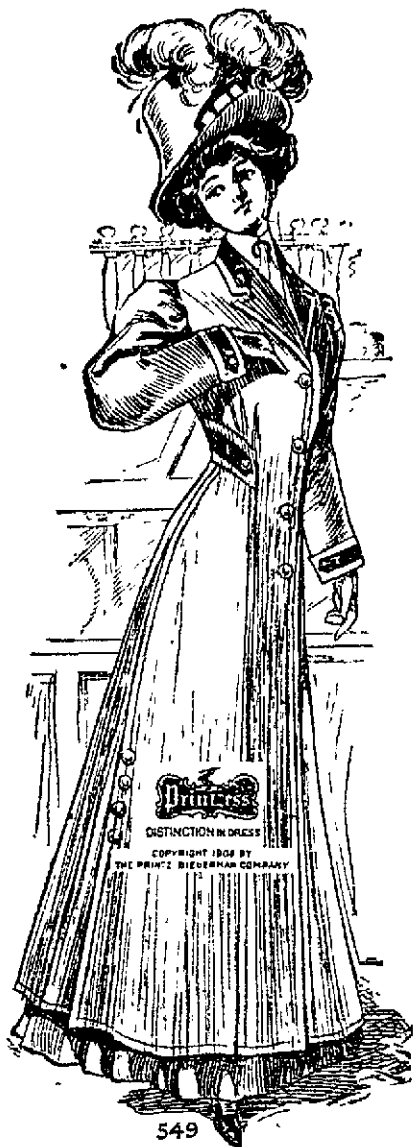

Mrs. Conna Holton of Newark is visiting her sister-in-law, Mrs. Ella Holton.

Mr. and Mrs. Frank Richcreek are

atrical circles. Cable reports say Lauder's manager had denied that the comedian's salary was to be \$5,000 a week, but New York theatrical men thought the denial was prompted by fear of the British income tax law.

Cap., \$200,000.00. Surp., \$100,000.00

4 Per Cent. Interest Paid on Savings Accounts and Certificates of Deposit

OF COURSE. Had the municipal affairs of Bay City been conducted as any prudent business firm or corporation conducts its own business the tax rate would not be one-half of what it is at present, the financial condition would not be a blot on the city or a burden to the taxpayers, there would be more paved thoroughfares and decent sidewalks, and there would be no illegal evidence of indebtedness in the form of "yellow horses."—Bay City (Mich.) Tribune.

A Modern Myth. Public ownership is a modern myth, devised by politicians to get into their own hands the management of undertakings which not one in a hundred of them has the business sagacity to create as a private enterprise.

At the annual meeting of the town of Peabody, Mass., the proposition to appropriate \$35,000 for remodeling the municipal electric plant was defeated.

The city clerk of McCook, Neb., writes that the proposition to bond the city for a municipal electric plant was defeated.

Don't use harsh physics. The reaction weakens the bowels, leads to chronic constipation. Get Down's Regulets. They operate easily, tone the stomach, cure constipation.

W. A. ALSDORF NOMINATED ON 20TH BALLOT

Licking County Man Receives Democratic Senatorial Nomination for 15th-16th District.

When the Advocate went to press Tuesday evening the Democratic Senatorial convention was in the midst of its proceedings at Idlewild park theater, and there was no indication of a nomination at that time, although seven ballots had been taken. On the ninth ballot there was a slight change when Licking cast five votes for Haas and Muskingum cast two for the same gentleman. This was repeated by Licking and Muskingum on the 11th ballot, in addition to Delaware casting her entire 34 votes for Haas, which looked like a break for that gentleman was imminent.

It being apparent that no nomination was in sight on motion a recess of ten minutes was had in order that the delegates of the different counties might get together and caucus.

When the convention was again called to order and the 12th ballot taken, it was seen that there were no changes to amount to anything, and the balloting continued in this manner up to the 20th ballot, although a number of gentlemen, among whom were Bell and Ellis of Muskingum, W. E. Miller and Howard Jones of Licking, and Haas of Delaware, received complimentary votes.

At this point in the proceedings Licking was granted ten minutes in which to consult, which was also taken advantage of by Perry.

During the short recess Mr. O. C. Larason, of this city, Democratic candidate for clerk of the Supreme court, was called on for a speech. Mr. Larason stepped to the front of the stage and was introduced by the chairman. He thanked the Democrats of the district, as well as the Democrats of the entire state for the honor that had been conferred upon him in making him their candidate for Clerk of the Supreme court of Ohio, and predicted the election of the entire Democratic ticket from president down to coroner. He assured his hearers that if elected, which he expected to be, he would administer the duties of the office for the best interests of the people. His remarks were enthusiastically applauded.

Upon motion of Mr. Cliff Rosebrough three ringing cheers were given by the convention for William J. Bryan for president, Hon. Judson Harmon for governor, and for the entire Democratic ticket.

When the convention was again called to order it was evident that something would be done, and from the very first it was evident that Mr. Alsdorf was the favored one. The result of the 20th ballot, taken at 6:15 o'clock was as follows:

Perry—Alsdorf 21, Hoskinson 16.
Delaware—Alsdorf 34.
Licking—Alsdorf 65.
Muskingum—Alsdorf 61. Hoskinson 2.

Total—Alsdorf 181, Hoskinson 18. When the result was announced the convention went wild with enthusiasm, and on motion the nomination was made unanimous. The successful candidate was rushed on the stage, and in a few words, brimming over with gratitude, thanked the convention for the honor that had been conferred upon him. At the close of his remarks the cheering was renewed, and if the enthusiasm created is any indication Mr. Alsdorf will be elected state senator by one of the largest majorities ever accorded a candidate in the district.

A SKY SCRAPER AT PINCHTOWN.

The good folks out at Pinchtown are elated over a scheme, to erect a big sky scraper there (now this may be a dream) to meet the boom that's coming and to satisfy a pride that Pinchtown folks are noted for, and also to provide an office building suited to the future of the place, for the people have awakened and have entered in the race. This spirit of Old Progress had its start away last fall, when Aurora Paint was specified to paint the old town hall. Aurora Mixed Paint is an honest old-fashioned lead and oil paint that weathers, and preserves the wood. Manufactured by The Marietta Paint & Color Co., Marietta, Ohio. Sold by Newark Paint Co., 31 West Church street.

OLD DIRECTORY

Published in 1874 Contains Many Interesting Facts Including List of City and County Officers.

A reporter of the Advocate was shown an old directory of the City of Newark, owned by Mr. Arthur Banton, that is quite a curiosity now. It was published in 1874, and is a small book containing only 115 pages. In glancing over the directory the names of the firms of many former well known business men appear, and of them all, only three who were in business at that time are engaged in the same business now. These three are: Mrs. J. L. Miller, grocer; E. J. Maurath, coal and Metz Bros., meat. The city officers at that time were as follows: Mayor, James White; solicitor, J. R. Banton; clerk, S. S. Wells; treasurer, L. A. Stevens; marshal, J. E. Rankin; engineer, H. G. Kings-

dury; street commissioner, C. B. Hamilton; weighmaster, A. Mattingly; market master, L. Renz; bridge master, C. McCarthy; pound master, C. Krismann; chief of fire department, Dan L. Jones.

City Council—Jas. H. Smith, president. First ward, J. H. Smith, F. Brown; Second ward, J. McCarthy, J. Moser; Third ward, J. Simpson, J. Koos; Fourth ward, E. Nichols, J. Hoover.

The county officers were as follows: Judge of the Common Pleas court, Charles Follett; Probate judge, Waldo Taylor; clerk of the court, I. W. Bigelow; auditor, W. D. Morgan; treasurer, L. A. Stevens; recorder, W. E. Atkinson; sheriff, E. Williams; prosecuting attorney, S. M. Hunter; coroner, J. E. Rankin; surveyor, G. E. Webb; commissioners, Ebas Padgett, Richard Lane and Phelix C. Harris.

JOHN MERIDITH CARTED CONCRETE FOR NEW PIER

Using the same wheelbarrow that was operated in removing the remnants of Meridith Brothers' stock of clothing a few weeks ago, Mr. John Meridith carted the first load of concrete for the cornerstone pier at Meridith Brothers' new store room on the Arcade Wednesday morning. Mr. Meridith took the load up the long narrow plank like an expert, and dumped it with the skill of a trained builder, while the crowd that looked on applauded. The contractor is hurrying the work on the Meridith Brothers' room, and it will not be long before that part of the building is ready for occupancy. The Meridith Brothers have ordered a big line of fine fall stock for their new store. When completed this store room will have a frontage on Third street with plate glass show windows on the Arcade the entire depth of their room.

SUMMIT STATION

HORSE FRIGHTENS AT AN AUTO, RUNS AWAY AND THROWS OUT OCCUPANTS.

Colored Man Struck by Passenger Train—Interesting Budget of Village News.

Sunday morning while Miss Bessie White and Sadie Giesick were driving north on Summit pike, their horse became frightened at an automobile, throwing the ladies from the buggy, dislocating Miss Giesick's shoulder and cutting Miss White's face. Dr. Carle attended to their wounds. The buggy was broken to pieces.

A colored man was struck here Sunday by an east bound passenger and badly injured about the back and arms. He was riding on a freight train, as keeper of the race horse, "Beaut Kennedy," and as the freight had gone in on the side track, he got off to go across the tracks for water for the horse when the passenger struck him, but he was able to walk back to the car and get on. Dr. Carle was called and dressed his wounds.

Mr. Claude Blaney and Mrs. John Saltz are both very sick at their homes with typhoid fever.

J. S. Axline is slowly improving. Mr. and Mrs. H. M. Layton celebrated their tenth wedding anniversary at their home on Broadway last Sunday. Those present to enjoy the festivities of the day were: W. M. Looker and family, Earl Douglas and wife, Harry Stewart and children, Charles Bagley and wife of Columbus, Martin Hines and family of Taylor's Station, Mart Wilson and wife, and Miss Marion Stewart of Pataskala.

Robert Wilson and family of Reynoldsburg, J. W. Haines and family of Jersey, Dean Belt of Appleton, John Dixon and wife of Columbia Center, Thurman Alberty and wife, Thomas Myers and wife of Beech, A. J. Hoskinson and family of Mink street, Dr. Carle and wife, Gail McIntosh and family, M. D. Brock and family, S. C. Stewart and family, and Mrs. Minnie McDowell of Summit.

Mr. Wilkins and family of Columbus were the guests of Mrs. Laura Shawan, Sunday.

O. A. Rustler and family returned home Saturday from a visit with Mr. Rustler's sister at Harpster, O.

Mr. Wesley Cummins of Newark was the guest of his sister, Mrs. Laura Griffith a few days the latter part of last week.

R. S. Kellerman was here Sunday with Rev. O. C. Colgrove and occupied the pulpit in the Universalist church, both morning and evening. Don't forget the church fair next Saturday night.

NOTICE TO CARPENTERS AND MASON.

All carpenters and cement block layers who desire to bid on the carpenter work or cement block work on the new North Newark C. U. church are hereby notified that all bids must be in by September 20. I. B. Dillon, for church.

Even when your cake is all dough you will find that lots of people are out for the dough.
